## HEAVY TRADE BOOM IN LAST YEAR LAUDED IN HOOVER'S REPORT

**WASHINGTON, Dec. 10.**—Reorganization of the government agencies dealing with commerce, mining, manufacturing, shipping, fisheries and transportation facilities into three groups, each under an assistant secretary, was recommended by Secretary Hoover today in his annual report to Congress. Whether these groups, which would concern themselves respectively with industry, trade and navigation, should be brought into the commerce department, he declared was secondary to the necessity for the grouping itself in order to obtain concentration of purpose to eliminate overlapping. A direct saving of upwards of \$1,000,000 a year in administration would be possible under the plan, he estimated, while many times that amount would be given to the public in increased values and services.

## GHOST TEST IS REFUSED, SAYS DOYLE

**NEW YORK, Dec. 10.**—The \$5000 reward offered by the Scientific American for convincing proof of spiritualistic phenomena is as usual by Sir Arthur Conan Doyle in a letter which the British novelist and psychic champion has written to the publication. This offer will attract the fakirs, detestable and those with genuine powers and muddle things generally, according to Sir Arthur, whose letter is printed in the January Scientific American. Among other arguments in favor of the occurrence of supernatural things, Sir Arthur incloses a photograph of a paraffin cast of a hand. This hand was materialized at a seance, the wax applied to it and the hand then dematerialized or evaporated. The paraffin cast, however, was not a hand, but a piece of wax.

## ASTORIANS, UNDAUNTED, WILL REBUILD

**ASTORIA, Dec. 10.**—With factional differences settled and coalition government established, actual reconstruction work began today and a committee of business men and representatives of the new executive committee began a survey to determine the location of the temporary business zone. Just as quickly as the zone is established, temporary business houses will be erected. Approximately \$75,000 is required for immediate purposes, according to the opinion of the executive committee, and an appeal was sent out tonight to Portland, San Francisco and Seattle for contributions. A part of the survey is being handled by the fire line.

## NEW GERMAN PLAN IS FLATLY REJECTED BY ALLIED CONFERENCE

**LONDON, Dec. 10.**—The German proposal for a rearrangement of terms for the payment of reparations has been rejected by the London conference. This information was given tonight by Premier Mussolini, the Italian Napoleon, who broke through the carefully-built wall of secrecy. The British tried to keep up their policy of a closed door to the last, only tonight giving out bare statements that the conference had discussed the proposals from Germany and would continue the discussion tomorrow. The French also revolted, but less radically than the Italians. After the conference, Premier Mussolini received correspondents from all over the world and declared the German proposals absolutely impossible to be accepted and all members of the conference agreed on this view. He declared a definite rejection will be sent to Germany.

## TWO WOMEN WOUNDED IN GUN BATTLE

**San Francisco, Dec. 10.**—In a running gun fight between negroes and two detectives tonight, two of the former were dangerously wounded by bullets from the officers' guns. Two of the negroes were women—Virginia Hurle, aged 23 years, being one of the two seriously hurt. Lella Vall, aged 23 years, is slightly injured and Marquis Johnson, the third member of the quartet who was hit by the detectives. The police are searching for the fourth member of the party.

## BUSY THUGS TAKE \$2500 IN ROBBERIES

**San Francisco, Dec. 10.**—Hold-up men worked zealously last night in three separate sections of the city, gaining about \$2500 in cash and jewelry from unfortunate citizens, according to reports made at Central Station. C. M. Juhl stated that he fell asleep in a pool hall on Main street near Second, awakening to find his pockets rifled. He lost \$150 in cash, his watch and \$100 in cash. Being friendly in a strange city, he was forced to become a lodger in the City Jail as he lacked money to rent a room. Diamonds valued at \$1800, a watch and \$95 in cash were taken from F. L. Green of 558 North Kenmore avenue by two thugs who menaced him with pistols in the bay front a saloon at noon. John Carlson told police officers that while walking on Los Angeles street, near Fifth street, accompanied by a friend, he was set upon by a pair of footpads who knocked him down and hustled him into an alley and left him after having stripped him of \$300, all in \$20 bills.

## CHINA RECEIVES KIAOCHOW

**TSING-TAO (Shantung, China), Dec. 10.**—The territory of Kiaochow was restored to China today with a striking lack of ceremony. The Chinese flag for the first time in twenty-four years was raised over the administration building which had been used by the Germans and later by the Japanese who seized the territory during the World War.

## LAND GRAB CHARGE HIT BY "TIGER"

**PITTSBURGH (Pa.) Dec. 10.**—(En route with Clemenceau to Chicago.)—Refreshed by a day of leisure spent in the city of the Allegheny Mountains, at the Hotel George Clemenceau is on his way to Chicago tonight, to make a brief address there tomorrow before a convention of farmers. The war Premier of France took two brief walks with members of his party—one being a hike of more than a mile along the Lincoln Highway with Bernard M. Baruch and Col. Stephen Duggan. A recent statement of Lloyd George touching upon the charges that France sought secretly to obtain the left bank of the Rhine was discussed this afternoon by Clemenceau in his private car as the second extended interview that he has granted newspaper correspondents. "I know of no party in France wishing to annex any German territory," he said. "We have claimed German territory and that shows we never meant to." The Tiger is due to arrive in Chicago at 3 a. m. He is to stay for New York in the afternoon.

## WAGE INCREASED

**ST. LOUIS, Dec. 10.**—Two hundred and twenty-five members of the Operative Plasterers and Cement Finishers' International Association are receiving \$1.50 an hour wages, an increase of 25 cents, by an agreement which went into effect last Friday. The wage increase is the first granted since the general wage reduction a year ago and is thought to be the result of an attempt on the part of organized labor to have the wage scale raised.

## PLANT DAMAGED BY FIRE

**INDIANAPOLIS, Dec. 10.**—Damage estimated at \$30,000 was caused by fire at the plant of the Big Four Wholesale Company at Frankfort. An officer of the company said he believed the first was of incendiary origin.

INDUSTRY CUTS  
ACCIDENT TOLLCommission Reports Fewer  
Deaths in 1921Abroad Work Shown to be  
Most DangerousAccident Bureau Needed  
for Injured Workers

(BY A. P. MONT WIRE.)

SAN FRANCISCO, Dec. 10.—The annual report of the Industrial Accident Commission for 1921 shows that the number of deaths in 1921 was 1,219, as compared with 1,321 in 1920. AIRMEN SOUGHT  
IN NEW FIELD

(Continued from First Page)

for Col. Marshall and Lieut. Webber.

Five airplanes left Kelly Field,

Texas today, and will go to the

squadron of nine planes already

operating out of Tucson, Ariz., in

search for the lost aviators.

TWO PLANES IN TROUBLE

(BY A. P. MONT WIRE.)

El Paso, Dec. 10.—The five

airplanes which left San Antonio

today to join the search for

Col. Marshall and Lieut. Webber

were forced to land at El Paso,

where the planes were damaged.

The plane piloted by Lieut. West-

side T. L. was the first to go

down, according to the report. It

fell near Medicine Lake, forty

miles west of San Antonio. The

plane piloted by Capt. W. T. Hayes

went down near Henderson, Texas.

News of the accidents was re-

ceived in a message to Army

officers from Capt. Hayes. The mes-

sage said: "Crashed at Henderson

and another ship went down at

the same place. The other three

planes arrived safely tonight."

MOTORISTS SEE TWO MEN

(BY A. P. MONT WIRE.)

NOGAL, (Ariz.) Dec. 10.—

Authorities of this section re-

ported that they had seen two

men in the desert near Nogal,

Ariz., who were believed to be

the missing aviators. The men

were seen by a motorist who

had been driving from Nogal

to the south. The motorist

said that the men were seen

in the desert near Nogal, Ariz.,

and that they were believed to

be the missing aviators. The

motorist said that the men

were seen in the desert near

Nogal, Ariz., and that they

were believed to be the missing

aviators. The motorist said

that the men were seen in the

desert near Nogal, Ariz., and

that they were believed to be

the missing aviators. The

motorist said that the men

(Continued from First Page)

mentaries, however, that the

people have ever rendered a

service to the state, and that

the Free State government is

another usurpation. Both

factions are engaged in a

deadly warfare against the

people's will, while the people's

lives and substance are being

steadily destroyed.

Technically the Republican

contention is true to this extent:

The treaty under which the Free

State government has derived its

authority was excluded from the

treaty by the people's vote. The

## CUNO PLAN FOR LOAN HITS SNAG

Industrial League Opposes  
New German Move

Deep Significance Attached  
to Dissension

Government Fears French  
Designs on Rhineland

BY S. B. CONGER  
(BY CABLE-EXCLUSIVE DISPATCH.)  
(Copyright, 1922, Public Ledger.)

BERLIN, Dec. 10.—Dr. Cuno's plan for intermediate provisional settlement of the reparations stabilization problems, which former Secretary of State Herr Bergmann who is now in London will submit to the League conference, has struck a snag here.

The project essence is a domestic loan, guaranteed by industry and big business. However, the National League of German Industry which has risen in its wrath because its assets were not obtained preliminarily to the decision, denies Dr. Cuno's right to pledge Germany's industrial resources without consulting it—in other words, until the League's conditions regarding taxation concessions, etc., are accepted.

This is the same snag which wrecked the plan for a similar loan suggested several months ago by the League itself. The Wirth Cabinet found, when it came down to brass tacks in the negotiations with the League, that the industrial advanced such demands for business control over the government, in a virtual surrender of State railways to an industrial consortium, abandonment of the eight-hour day, etc., that the loan in its proposed form was unacceptable.

PLANS TO PROCEED  
An opposition has a deeper political significance than merely a conflict with the Manufacturers' Association. It means a conflict with the people's party which is dominated by large manufacturers and business men and upon whose support the Cuno Cabinet was formed. It is understood nevertheless, that Dr. Cuno proposes to go ahead negotiating with the League on this basis and try to bring business interests into line by force later if he is successful.

A Cabinet member today spoke very discouragingly about the obstructive attitude of big business and doubted whether it would be possible to count in any way upon its voluntary aid toward solving the problem of financial sacrifices, though these interests prevailed upon Dr. Cuno to accept the Chancellorship.

It was also declared the government was gravely concerned over the Rhineland situation, believing the French government had made up its mind to chuck all hope of reparations and take the Rhineland and a Rhine frontier instead by establishing some form of buffer state.

GERMANS SCORE POINT  
Every political party and business and labor organization in Germany has been mobilized in a campaign to keep the Rhinelanders in line, and to make such a demonstration of solidarity that British help can be enlisted if possible against the French designs.

The Germans scored a point today against the French and separatist allies who called a separatist meeting at Bonn, just outside the American zone. The Germans instructed their followers to attend the meeting en masse and drown the speech of "President" Dietrich of the Rhineland Republic with cheers for Germany and by singing the "Watch On The Rhine." The French authorities forbade the meeting altogether.

WOOD FUEL POPULAR  
(EXCLUSIVE DISPATCH.)  
OMAHA, Dec. 10.—More wood fuel cut and buzzed along the Platte River is being used in Fremont than ever before, according to woodchoppers.

## FORTUNE LEFT BY HUMORIST

Marshall P. Wilder's Fun  
Cashed in For  
Near \$500,000

(BY A. F. NIGHT WIRE)  
NEW YORK, Dec. 10.—Marshall P. Wilder, the humorist, left an estate valued at \$294,333, it was revealed when an application for the settlement was filed in Surrogate's Court today, seven years after his death.

Wilder, a dwarf of peculiarly mobile countenance and agile humor, was one of the country's best-known vaudeville artists in the '90s. His first public performances were made at a salary of 50 cents a night.

The estate will go chiefly to a son, Marshall P. Wilder, and a daughter, Grace.

## VERA CRUZ MAY LOSE SEA TRADE

Longshore Labor Union's  
Attitude Causes Transfer  
of Ocean Commerce

(EXCLUSIVE DISPATCH.)  
(Copyright, 1922, Public Ledger.)  
MEXICO CITY, Dec. 10.—Vera Cruz is in danger of losing all trans-oceanic shipping. It was announced yesterday from Vera Cruz that trans-Atlantic lines touching there have carried into effect a threat to suspend all freight traffic from the port for six months owing to the difficulties with terminal hands in unloading and loading vessels.

The trade will be transferred to other ports, especially Tampico and Puerto Mexico, both of which are anxious for the patronage of ocean lines. The maritime league, to save the situation it has caused, took action yesterday in an attempt to boycott ocean liners from all other gulf ports. To this end it directed circulars sent to its representatives to confer with members of the union in other ports. The order to suspend freight traffic came from the head office of the steamship union in London. Workmen in other gulf ports are anxious to profit by the loss of traffic in Vera Cruz.

President Obregon yesterday declared against the action of the Maritime League in attempting to shut out all non-union men from work in the port.

The official government organ, El Mundo, condemns the action of the league, pointing out the selfishness of its policy and almost certain failure in the struggle against the steamship companies with the consequent irreparable loss to the port of Vera Cruz.

Other daily papers show that 5000 workmen in Vera Cruz have paid rent in the houses they occupy in the last year.

EMPLOYMENT SHOWS  
GREAT INCREASE  
NOVEMBER BEST MONTH  
SINCE JANUARY,  
SAYS REPORTS

(BY A. F. NIGHT WIRE)  
WASHINGTON, Dec. 10.—Increase in employment over the country in November was greater than during any month since January, is shown in reports to the United States employment service.

In making public a summary of the reports today, the service said a further expansion was prevented only by inadequate rail transportation for commodities. The country's labor shortage has been relieved in a measure by the release of farm workers, it was stated, but this shortage still is apparent in many parts of the country.

Employment gains were noted particularly in the iron and steel, metal, tobacco, textile and oil industries.

"All manifestations point to a steady upward trend in employment," the announcement said.

## VENICE PLANS FLOAT AT ROSE TOURNAMENT

DESIGN WILL BE IN HANDS OF  
THE HIGH SCHOOL  
STUDENTS

By a "Times" Staff Correspondent  
VENICE, Dec. 10.—Members of the Amusement Men's Association, the Chamber of Commerce and Venice High School students are planning a float which will be entered in the Tournament of Roses in Pasadena New Year's Day, and which, it is said, will be the most beautiful of the year.

The amusement men and Chamber of Commerce will pay for the float, and construction and design will be left with students, with Mrs. Susie Dando in charge. Plans will be approved before the Chamber of Commerce at their meeting today.

## MOTHER AND FOUR TOTS DIE IN FIRE

(BY A. F. NIGHT WIRE)  
EL DORADO (Kan.) Dec. 10.—Mrs. C. C. Cotton and her four small children were burned to death last night at El Dorado, twelve miles south of here, according to a report reaching here. When Mr. Cotton returned to his home from trip to Aurora, he found his wife outside the house dead with her clothing burned from her body. The house was burning and the cries of the children could be heard. They were dead when he found his way through the flames and carried them out.

TURKS DESTROY RAILROAD  
(BY CABLE-EXCLUSIVE DISPATCH.)  
SOFIA (Bulgaria) Dec. 10.—Bands of Turks have destroyed the railroad near Dedagatch, in Western Thrace.

## Pacific-Southwest Review

BY AUSTIN O. MARTIN  
Vice-President, The First National Bank of Los Angeles

Austin O. Martin

California's excellent highway system is a factor of very great importance not only in making this State a delightful place in which to live and a Mecca for tourists, but also in the efficient marketing of its products. Because of the importance of agriculture in this State, it is difficult to fully realize the tremendous value of our highway system, a brief study of which, particularly with regard to the southern half of the State, should be of interest to anyone engaged in business in this territory.

There are approximately 3,000 miles of paved highway in this district so placed that practically all productive districts are connected by paved roads. Active construction work on still further important highways is already under way.

An idea of the location of these roads may be gained from the fact that Los Angeles County has 425 miles of paved roads; more than any one of the other thirteen counties in the southern half of the State. San Bernardino County, the largest county in the United States, has 115 miles of paved roads. The remaining twelve counties of the southern half of the State, according to mileage of paved roads, are as follows: Tulare, 303; Fresno, 249; Kern, 235; Riverside, 228; Orange, 217; Ventura, 194; Santa Barbara, 185; San Diego, 157; San Luis Obispo, 125; Imperial, 125; Inyo, 16.

Although there is an important State highway system built by the State of California, every county in the southern half of California has one has assisted considerably in the construction of paved highways. In Los Angeles County, 435 miles of paved roads were built by the county itself, and this proportion holds true for practically every county in this section of the State.

ART SCHOOL INFECTED,  
PARIS PAPER CHARGES  
AMERICAN ARTISTS HOUSED  
IN ONE-TIME HOSPITAL  
GET WARNING  
(BY CABLE-EXCLUSIVE DISPATCH.)  
PARIS, Dec. 10.—The current issue of Carnet De La Semaine charges that the Louis XV wing of the American Conservatory of Music at Fontainebleau is dangerous to the health of the young American artists lodged there because it was infected during the war by occupancy as a military hospital for contagious diseases and has never been disinfected.

A precise report addressed in 1921 by a delegate of the New York Committee to the Council of Administration demanded disinfection and called attention to the danger of an epidemic. The American delegates will henceforth keep silence on this question, it is said, because she expects the Legion of Honor which had been promised her for her services. The facts are given to the American friends, but there are others not less grave which will be exposed later.

## CONVICT COLORADOAN IN SOLDIER'S MURDER

(BY A. F. NIGHT WIRE)  
LITTLETON (Colo.) Dec. 10.—William Patton was found guilty of first-degree murder for killing Corp. Benjamin Mesheff of the United States Army at Logansport, Colo., on October 20, by a jury in the District Court here last night. The jurors deliberated one hour and thirty minutes. The penalty was fixed at life imprisonment. Mesheff's death occurred during a free-for-all fist fight in the town square, and that when he saw Mesheff rushing toward him he was frantic from exhaustion and fear. He asserted he did not remember what happened until he saw Mesheff's body lying in front of him.

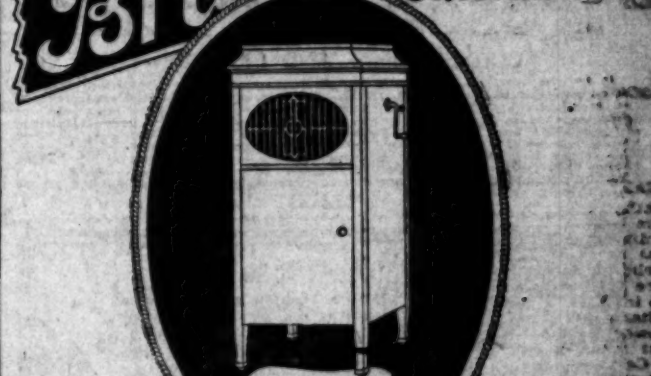

## SAFETY ZONES URGED INDIANAPOLIS

(EXCLUSIVE DISPATCH.)  
INDIANAPOLIS, Dec. 10.—Dr. Paul F. Robinson, County Coroner, in a letter to Mayor Shank yesterday, suggested the establishment of safety zones in all main thoroughfares in the city. His letter was written after he had heard testimony of seven witnesses in his investigation into the death of Mrs. Dolly Mitchell and Miss Josephine Herman, who were run over by automobiles and killed in East Washington street.

## RULES MADE FOR CONDUCT OF JUDGES

(BY A. F. NIGHT WIRE)  
NEW YORK, Dec. 10.—A code of ethics for the judiciary, which has been drawn up for submission to the executive committee of the American Bar Association at Hot Springs, January 16, by a preliminary committee headed by Chief Justice Taft, covers not only the public life of judges, but the private as well.

COAL INDUSTRY  
FOUND BLOATED

Commission Reports Waste in  
Over-Development

Too Much Capital and Too  
Many Miners

Recommendation is Made  
Against New Investments

(EXCLUSIVE DISPATCH.)  
WASHINGTON, Dec. 10.—Over-  
development of the bituminous coal  
mining industry is one of the causes  
of present unsatisfactory condi-  
tions. President Harding's coal  
commission asserts in a statement  
issued yesterday.

One reason for high prices, it is  
stated, is that the consumer is sup-  
porting a vast surplus of invest-  
ment and capacity. It is urged  
that there should be no new in-  
vestments in coal mining ventures  
under present conditions.

“Too many soft coal mines and  
too many miners,” is the way the  
commission describes the situation.  
“In these coal mines more capital  
is invested and more miners em-  
ployed than are needed to produce  
the coal the country requires. This  
condition of course involves waste  
on a country wide scale.

“The present in-  
flation of the industry is cannot be  
stated exactly at this time but un-  
questionably the inflation is ex-  
cessive.

DEFLATION PROBLEM

“Estimates of the excessive mine  
capacity range from 10 to 50 per  
cent above the country's normal  
demand which for the last five  
years has averaged about 515,000,  
900 tons a year. Based on the  
basis of their actual output for the  
best week in 1918, the capacity of  
the soft coal mines was 515,000,  
900 tons. Since 1918, unfor-  
tunately, the mine capacity has  
been further enlarged and another  
estimate of it can be made from  
the average daily output last year;  
390 days' work at that rate would  
have resulted in 540,000,000 tons  
being mined, or fully 40 per cent  
more than the normal needs of  
the country.

“How to deflate the coal indus-  
try is one of many problems be-  
fore the commission and its re-  
ports may be expected to present  
facts bearing on this question. It  
seems plain enough, however, that  
the industry should not be fur-  
ther inflated by opening new  
mines.

ROADS OVERTAXED

“The facts already presented  
furnish a valid argument against  
continuing to enlist new capital in  
the business, thereby opening new  
mines that are worse than un-  
needed, for they further spread,  
and this overtax, car supply and  
shorten the possible working time  
of mines in the vicinity that are  
already well equipped to ship 50  
to 100 per cent more coal than  
they ship now. Indeed, the rat-  
ings of mine capacity reported to  
the railroad for the purpose of  
obtaining cars would indicate that  
the bituminous mines of the coun-  
try have a total annual capacity  
of not far from 1,000,000,000 tons,  
instead of the 500,000,000 tons  
needed.

“Exceptions may possibly be  
made here and there to the  
which the investing public should  
put on coal-mine development. A  
local market not well supplied with  
coal may warrant the opening of  
a near-by mine, which would  
thereby help to relieve the burden  
on transportation facilities, but it  
is believed that such exceptional  
conditions are rare.”

Pennsylvania  
Senator Given  
Service Medal

(EXCLUSIVE DISPATCH.)  
WASHINGTON, Dec. 10.—Sen-  
ator David A. Reed of Pennsylv-  
ania was awarded the distin-  
guished service medal for “excep-  
tionally meritorious service” as an  
artillery officer in France. Presen-  
tation of the medal will be made  
by Secretary Weeks at a date still  
to be determined.

The services noted in the War  
Department's citation included  
Maj. Reed's conduct in bringing  
the artillery battalion which he  
commanded into a high state of  
efficiency through his “professional  
attainments and tireless energy”  
and his “delicate and diplomatic  
treatment” of his assignments as  
acting Chief of Staff of the Ameri-  
can section of the Interallied Ar-  
mistic Commission at Spa, Bel-  
gium. In France Maj. Reed com-  
manded a battalion of the Three  
Hundred and Eleventh Field Artil-  
lery.

RUSS EMPRESS  
GOES TO BRITAIN

(BY CABLE—EXCLUSIVE DISPATCH.)  
COPENHAGEN, Dec. 10.—Marie  
Feodorovna, empress dowager of  
Russia, who since her escape from  
South Russia has been living in  
Denmark, her childhood home, has  
left for England.  
It is understood she will spend  
the rest of her life with Queen  
Alexandria of England, her sister.  
The empress still cherishes a  
reminder of her former imperial  
status in the form of her giant Cos-  
ack life guards—two of whom ac-  
company her everywhere she goes,  
wearing the brilliant uniforms of  
the old imperial escort.

NO MORE EXECUTIONS  
EXPECTED IN GREECE

(BY CABLE—EXCLUSIVE DISPATCH.)  
ATHENS, Dec. 10.—The trials of  
those involved in the Asia Minor  
debacle will continue, and minor  
officials and officers are being in-  
terrogated. It is believed the sen-  
tences of those found guilty of trea-  
son will be fines and imprisonment.  
The government's attitude is  
against further executions, al-  
though extremists and the rank and  
file of the revolutionary group de-  
mand the death penalty for some  
of the conspicuous figures in the  
campaign.

Los Angeles Daily Times

Doing a  
big thing in

American Not  
Accused as Spy,  
Japan Asserts

(BY CABLE AND ASSOCIATED PRESS.)  
TOKIO, Dec. 9.—(Delayed)—Vis-  
count Uchida, Foreign Minister, re-  
plying today to Ambassador War-  
ren's recent protest in the meth-  
od of dealing with R. M. Andrews,  
an American who has lived in  
Japan for many years, says it is  
clear that no charge of being a  
spy was made against Andrews,  
and that the allegation of being  
suspected of espionage was based  
on unfounded rumors. Andrews  
has been interrogated by the Jap-  
anese authorities for running his  
motor-boat in the vicinity of fort-  
ifications.

Andrews, it is said, will plead  
guilty to a minor charge of a  
breach of navigation laws when  
his case is called.

COMING TO COAST

(EXCLUSIVE DISPATCH.)  
INDIANAPOLIS, Dec. 10.—Mrs.  
Charles B. Fletcher will leave soon  
to spend this winter in California.

SOUTHLAND MAILMEN  
PUT ON HONOR LIST

(EXCLUSIVE DISPATCH.)  
WASHINGTON, Dec. 10.—A sup-  
plemental honor list containing the  
names of letter carriers, who have  
reported 100 per cent perfect in  
the campaign to induce city dwell-  
ers to install door slots or recep-  
tacles for mail was announced by  
the Postoffice Department today.  
The list, which contains more than  
125 names, shows the following  
from California: William A. Mas-  
son, Long Beach; C. E. Phifer, Los  
Angeles Harbor, and Eneas C. Hay-  
man, Santa Barbara.

DUKE NAMED NORTH  
IRELAND GOVERNOR

(BY CABLE—EXCLUSIVE DISPATCH.)  
LONDON, Dec. 10.—The Duke of  
Abercorn has been appointed Gov-  
ernor-General of Northern Ireland  
(Ulster), according to an official  
announcement. The Duke's posi-  
tion in the six northern counties is  
similar to that occupied by Timo-  
thy Healy, representative of the  
crown in Southern Ireland. North-  
ern Ireland has refused to join the  
Irish Free State.

Paper Thinks  
Peace Envoys  
Prefer Quiet

(BY CABLE—EXCLUSIVE DISPATCH.)  
PARIS, Dec. 10.—L'Intransigeant  
tonight suggests the establishment  
of a permanent headquarters for  
the itinerant Allied peace confer-  
ence which, it points out, is now  
enjoying its twenty-eighth session  
since Versailles four years ago.  
Referring to the London parley it  
says:  
“The conference well merits a  
permanent place away from jazz  
bands and formal dinners. It  
should please all the ambulatory  
personnel who by this time are  
becoming too familiar with the  
latest fox trots, languorous melo-  
dies and palatial hotel dining-  
rooms where jewel-laden trans-  
Atlantic tourists pay well to sit  
near celebrities and plead for  
autographed menus.”  
It is ironically suggested that  
some yet unadvertised European  
playground sacrifice its hotels as  
Geneva did for the League of Na-  
tions.

## WU SAYS HE'LL FREE CAPTIVES

### General Resents Proposal to Investigate

## Powers Told Troops Will Quell Banditry

### Weakness of Government Force Noted

BY CHARLES DAILEY  
[BY CABLE—EXCLUSIVE DISPATCH.]  
HONAN FU (China) Dec. 16.—

General Yu Pei Fu, the dominant figure in the Peking government's sphere of influence, in an interview at his camp here yesterday expressed his resentment of the action of the powers in asking permission to investigate bandit conditions, asserting this was interference in Chinese internal affairs. He said he would accept the action solely because the request was transmitted through the Foreign

"Fortunately," said Gen. Wu, "the powers recognized the sovereignty of China by asking the Foreign Office to forward the telegram, to which I am replying."

through the same channel, that in view of the steps taken it is not necessary to send a commission.

"I expressed my regrets to the five powers that their citizens were captured. I also detailed a plan worked out by myself and the mili-

tary and civil governors of Honan, for the release of those not freed. First of all the national troops in Honan are concentrating for encircling the bandits, and other measures will be taken to free the prisoners. Also national troops will

"I stated that the proposed commission of the powers would be to express an opinion that in view of the situation to express an opinion that in view of the situation

The Times' correspondent, who had just completed a tour of the disordered region, also expressed belief that there were not enough troops in the district and intimated

that it was significant that Gen Wu was not receiving aid from other national troops, causing a belief that he was being isolated

qualities still existing in the price levels between various commodities and between wage earners and farmers.

"Some relief," he said, "could be given to the farmer by such a reduction of railway rates in such fashion as to make the transportation upon high-priced commodities and lower rates on primary products. A greater relief would be given if the rate provided for an adequate transportation. Further relief would be given by the provision of a credit system by which to meet his needs of loans for periods in excess of Federal Reserve facilities and at nearer the commercial rate of interest.

Liberalization of the law with respect to trade associations was favored by Mr. Hoover to the extent that the law should be amended generally, as distinguished from capital consolidations, should be permitted to file with some appropriate governmental agency their plan of their operations, the functions they propose to carry on and the objectives they proposed to carry out. That upon approval of these functions as did not apparently contravene public interest might be proceeded with, that upon complaint, either by individuals or by the government, that these functions had reacted against the public interest, a hearing should be held before some suitable tribunal and the right to continue these particular functions should, if the complaints were found justified, be suspended.

Discussing the effects of the new tariff law, Mr. Hoover asserted that generally the volume of the country's exports likely to be increased by the increasing prosperity at home.

"A logical assumption," he said, "that the new tariff will so diminish our imports as to strengthen the buying power of foreign countries for our exports does not seem to be borne out by a critical examination of the actual facts involved. Somewhere between one-third and one-half of foreign buying power for our exports is furnished by invisible exchange. Beyond this somewhere from 43 to 55 per cent of commodities shipped to us from abroad are upon the free list (based upon applications of the Fordney tariff to the 1921-23 import schedule) where about 60 per cent free, so the buying power is untrammelled up to, say, 70 to 80 per cent. The remainder of our exports is made up of such things as large part such goods as will be imported in any event, as sugar, wool, luxuries, etc. Therefore it would be a mistake to assume that the volume of exports would be very greatly influenced one way or another by the tariff.

"The elimination of the railroad situation, the Secretary described the needs for revision of railway legislation to prevent their being a serious hindrance to commerce through a shortage of transportation.

"We must have increased transportation," he said, "in order to maintain our growing productivity. We must therefore find a way out of the cycle of systematic transportation a large part of our mileage and the denouement of our railway managers of their responsibilities and initiative."

Stabilization of the bituminous

## There is No "Water" in Santa Fe Stock

President Storey issues another Statement, of Interest to Santa Fe Patrons

The charge is still made that the railroads are asking returns on "watered stock."

Congress undertook to ascertain the facts through the Valuation Act, which was introduced by Senator LaFollette. The Interstate Commerce Commission has been conducting this valuation for nine years, and the following elements are considered: Cost of reproduction in the years 1913 to 1916, cost of reproduction less depreciation, original cost, other values and elements of value. Stocks and bonds or earning capacity have not been considered.

From all the data available the Interstate Commerce Commission has found—

Valuation of all the railroads in 1920. \$15,900,000,000

Net capitalization of all the railroads

December 31, 1919. 16,939,515,522

Value above capitalization. \$ 1,960,484,478

Otherwise stated, the value of the railroads is TWO BILLION DOLLARS in excess of the net face of all stocks and bonds. If present day unit prices had been used, the excess would be far greater.

This should dispose of the question of "watered stocks."

But recently reference has been made to the "valuation that the railroads have succeeded in putting over on the Interstate Commerce Commission." The valuation work on the Santa Fe is nearly completed and we know that we have not "put anything over" on the Interstate Commerce Commission. On the contrary, we believe that the Interstate Commerce Commission has been over-strict in its rules and methods of valuation, and that as a consequence it has greatly undervalued our railroad.

When the work is completed, no "water" will be found in Santa Fe stock.

W. B. STOREY, President,  
The Atchison, Topeka and Santa Fe Railway System.

# ASPIRIN

SAY "BAYER" when you buy Aspirin

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product prescribed by physicians over twenty-two years and proved safe by millions for colds, headache, toothache, earache, neuralgia, rheumatism, influenza, and for pain in general. Aspirin is the trade mark of Bayer Manufacturing of Monocetate, dealer of Salicylic Acid. (Advertisement)

## DEMOCRATS IN JOYOUS MOOD

They Propose to Grab All Arizona Offices

Bourbon Leaders Gather Under Plum Tree

There'll be Nothing Left for G.O.P. Men

(EXCLUSIVE DISPATCH.)

PHOENIX, Dec. 10.—From Governor to elevator boy, deserving Democrats only will be found in the State Capitol soon after the start of the new year. There may be a suspension of business for a few weeks in the case of such officers as the Adjutant-General and Water Commissioner, until the legislature can establish a new status, but that will be all the way expected.

Temporarily, a half-dozen Republicans will come in for the legislative session, but they will be in such a minority that the Democrats are expected to feel safe in organizing two legislative camps within their own strength. Whether these camps will be administrative and anti-administration remains to be seen.

Thus far, with the offices still undistributed, it appears that the Bourbon leaders are gathering under the plum tree, and there is assurance of fullest harmony and of union in the rejoicing that will be manifested when the class march in on January 1.

Of the appointive positions there are but a few, and these are held by F. R. Goodman, State Secretary, H. S. McCluskey and as Secretary of the Commission of State Institutions, E. W. Samuel, the last also to be purchasing agent.

PLUM FOR CASSIDY

There is probability that the \$1000 place of Commissioner of Banking will go to H. B. Cassidy, now cashier of the Commercial National Bank of Phoenix. The land commissionership, considered the most important place of all, still is unannounced, with possible appointment of Vernon Vaughn, chairman of the State Democratic Committee, or C. M. Zander, a former member of the State Tax Commission, and one of the Hunt campaign managers. After the law is fixed a bit, there may be appointment to the place of Adjutant-General of Col. Chas. H. Harris, who was in charge during previous Hunt administrations, or Maj. E. S. Linton, who had charge of the State cadet work, or Capt. Jerry Croft, commanding a Phoenix rifle company. For water commissioner there has been gossip only of George H. Maxwell, who is understood to have changed his residence from California to Arizona, and who is known to be highly esteemed by the Governor-elect.

R. B. Sims of Florence is understood to be confident of reappointment to the superintendency of the State penitentiary, a position which he filled during the last Hunt administration. It is known that George H. Kelly, veteran editor of the Douglas International, has been offered the place of State Historian.

MANY RECEPTIVE

It is told there is no lack of applications for the place of Superintendent of the Pioneers' Home at Prescott and Superintendent of the Industrial School at Fort Grant. There also are a few commissions to be reorganized, such as the Live-stock Sanitary Board, the Sheep Sanitary Board, the Board of Health, which already has a Democrat as executive officer; the board of education of the normal schools at Tempe and Flagstaff and the State Fair Board, while a couple of appointments to the State University will come to Hunt in his first year.

In the minor places, Robert E. McMillan is to go back to his post of Assistant Secretary of State, filled by him under Sidney Osborn and Mr. Sims. H. M. Stanley, statistician for the Tax Commission, said to be listed for chief clerk of the highway department. Glenn D. Grant is to be Deputy Treasurer, Frank McCann is to be an assistant in the Attorney-General's office, Anna Davis is to be assistant State Superintendent of Schools, James Malley, former man of the Wolverine & Arizona mine in the Warren district, is to be Deputy Mine Inspector for the southern district, and Henry Cassidy will have a similar post in the Globe, Ray, Superior and Morenci sections.

COUNTRY EDITORS, NOTE

The Coconino Sun, published by Col. Fred S. Breen at Flagstaff, now proudly announces itself as the only "country weekly" anywhere printed on its own perfecting press. But the press had to be bought, for the Sun had from sixteen to twenty-four pages each issue and the presswork, on a slow cylinder machine, took most of the week. The work now is done in a sixth of the time.

Sam W. Proctor, editor of the Window Mail, has incorporated the paper and has bought the printing plant of the Flagstaff Daily Leader.

S. A. Meyer, for ten years manager of the Chandler Arizona, has bought the News at Newport, Cal., and will move to the Coast. His first office in Chandler was a tent.

The Prospector, at Tuolumne City, Calaveras county, Cal., has been bought by William Ladd, a pioneer Arizona printer. Since 1879, when he worked on the Phoenix Exporter, he has been traveling in the west, rarely remaining on a job more than a few months, yet welcomed everywhere, finding a friend in every print shop.

Charles E. Hughes, who died lately in a Prescott sanitarium, was a newspaper man of broad experience, latterly connected with the International News Service in Los Angeles, after employment on a Los Angeles paper.

COLORADO MURDER

JURY IS STILL OUT

(BY A. P. NIGHT WIRE.)  
DURANGO (Colo.) Dec. 10.—The jury in the case of Rod S. Day, editor of the Durango Democrat, charged with the murder of William L. Wood, city editor of the Durango Herald, was still deliberating at 5 o'clock tonight. The case went to the jury at 12:10 o'clock this morning.

## PLAINTIFF WINNER IN CLAIM SUIT

Judgment Found Against Defendant in Prescott, Ariz., Mine Action

(EXCLUSIVE DISPATCH.)

PRESCOTT (Ariz.) Dec. 10.—The judgment in the case of R. E. Moore against the Arizona Jerome Copper Company was given the plaintiff after seven days of trial, inclusive of a day in which the court and both sides to the litigation visited the property involved near Jerome and studied the land and the location notices. It was found that the defendant had failed to file the assessment work exemption affidavits during 1919, when assessment work was not demanded by the government, and that the remaining three claims there had been a change of locations.

Alexander McKay and Fred S. Stephan, managing directors of the Dundee company, were late visitors from Scotland to the property of the corporation in Jerome.

C. A. Cooper, a Pittsburg mining engineer, accompanied by E. F. Thompson, lately made inspection of the properties of the Howard Silver Mining Company in the Turkey section. Statement followed that the company has a mine of large ore bodies, with values that will permit operation at a profit.

The Goodwin Silver Mining Company lately shipped a carload of ore from its property at the head of Turkey Creek to the Hayden smelter, with returns of an average of 12 ounces silver and 3.7 per cent copper. The main shaft has a depth of 150 feet.

Patent of ten claims in the Turkey district has been applied for by the Kirkland-Arizona Copper Company, of which C. A. Cooper of Pittsburg is vice-president. Funds are on hand to sink the shaft 500 feet.

## England's Best Loser Is Still Seeking Cup

(BY A. P. NIGHT WIRE.)

NEW YORK, Dec. 9.—Sir Thomas Linton, who has been in America for several weeks, sailed for England on the steamship Homeric today, and his parting message was "I'm still hoping to lift the cup."

Sir Thomas, who has made several attempts to take America's cup from America, asserted he surely would make another try in 1924. He said he has not decided on the type of challenger.

## MARKET SITUATION IS SATISFACTORY

FUNDAMENTAL CONDITIONS REGARDED AS SOUND IN EASTERN STATES

(BY A. P. NIGHT WIRE.)

NEW YORK, Dec. 10.—Reports concerning the fundamental conditions underlying the financial markets continued to be satisfactory the past week. Railroad traffic is holding at an extraordinary high level considering the season. Thus carloadings during the week ending November 25 last totaled 955,000 cars, which represent an increase of 121,000 cars over the corresponding week a year ago.

Although the week's movement was some 14,000 cars smaller than in the preceding seven-day period this decline is more than accounted for by the loss of traffic resulting from cessation of navigation on the Great Lakes. Loadings of merchandise and miscellaneous freight were, in fact, greater.

It appears that the bituminous coal output is continuing at a daily rate corresponding to 11,000,000 tons a week.

Final figures for the earnings of class one roads during October show that the total net for the month amounted to \$28,000,000, which, while some \$20,000,000 below the total in the same month a year ago, when earnings were unusually good, is still \$17,000,000 better than the showing in September.

A recession of about 2 per cent in the rate of reserve of the combined Federal reserve system brings that figure down to 74.3 per cent. This is slightly lower than any other figure recorded this year, but is still high enough to demonstrate very ample supplies of commercial credit.

The grain markets have been rather quiet, partly because of uncertainty regarding foreign developments, but prices have been firm.

## DAUGHERTY MAY FACE ADDITIONAL CHARGES

COUNSEL FOR ACCUSED MINDS OF "HIGH CRIMES AND MISDEMEANORS"

(BY A. P. NIGHT WIRE.)

WASHINGTON, Dec. 10.—Jackson H. Ralston, counsel for Representative Keller, Republican of Minnesota, who has brought impeachment charges against Attorney General Daugherty, wrote Chairman Volstead of the House Judiciary Committee today that he "may find it necessary to place before the committee additional charges of high crimes and misdemeanors."

Mr. Ralston said these charges might be "of equal or greater importance" than those contained in the fourteen counts recently filed with the committee, hearing on which will begin before the Judiciary Committee Tuesday.

In connection with Mr. Ralston's letter, Mr. Keller made public a number of letters, including one from Chairman Volstead to Mr. Ralston, saying that the committee desired to investigate all of the charges and wanted to know what witnesses were to be used in considering the first specification relating to prosecution of antitrust suits. Mr. Volstead said this was necessary "because as to some of the charges the committee may desire to hear you as to whether they are impeachable before incurring the expense of sending for witnesses to substantiate them."

FIVE YEAR GUARANTEE ON FEDERAL

THURSDAY, Dec. 10.—The Federal Reserve Board has announced that it will guarantee for five years the principal and interest on the bonds of the Federal Reserve Bank of New York, issued for the purpose of raising money to purchase government securities.

We believe that never before in Los Angeles have coats of such high quality been offered at such a low price. A limited number at this special low marking. Broaden her Christmas smile with one of these.

Included at \$39.50 are coats in Camel's hair, polo cloths in all colors, gabardines, etc. Some short sport models, some long—some all silk lined, some all yoke lined.

## SAILOR IS KILLED BY POLICEMAN

Officer Called to House by Woman's Screams Says Seaman Threatened Him

H. R. Peralta, a sailor from the U.S.S. Idaho, was shot and instantly killed early yesterday morning by C. D. Patterson, an emergency officer, on the doorstep of a rooming-house at 124 1/2 North Spring street.

Summoned to the scene by the screams of Mrs. E. Willis, the proprietress of the rooming house, who asserts that the sailor attacked her after she had refused to rent him a room, Patterson made an effort to arrest the man.

He says that Peralta threatened to "shoot him up" and was reaching toward his hip. The officer drew his revolver and shot Peralta through the heart.

Previous to the shooting, Patterson had been in the police department only three days and was not in uniform except for the official white cap of an officer. He was also carrying a card which explained his status in the department.

He is being held in the City Jail, pending an investigation of the shooting by Officers Ball and Partin.

It is reported that Navy officials also will conduct a thorough investigation.

## RELEASE WOMAN WHO SHOT MAN

Police Free Mrs. Moores on Own Recognizance

Officers Charge Victim With Leading Dual Life

Wife With Bulow When His Injury Occurred

Mrs. Lillian Moores, aged 27 years, of 418 East Twentieth street, Long Beach, who was taken to the City Jail Saturday night on a charge of attempted murder, after she had shot and seriously wounded Walter Bulow, aged 28 years, the manager of the San Pedro office of the Shipowners' Association, was released by Justice Baird yesterday on her own recognizance.

At the time of the shooting, which took place Saturday night on the Harbor Boulevard, about two blocks north of Anaheim avenue, Bulow was on the way to Los Angeles with his wife, Mrs. Moores. In another car, passed the two, turned around and, after a short pursuit, caught up with them.

What happened then, and certain events leading up to this climax have been subject to various explanations.

DOUBLE LIFE ASSERTED

It has been determined that Bulow was leading a double life as the husband of Mrs. Bulow, with whom he was living at 1348 Cedar avenue, Long Beach, and also as the fiance of Mrs. Moores, to whom he is reported to have been engaged since last July, the police declare.

Evidence to this effect has been obtained, the officers say, from the statement of Mrs. Moores, an investigation of the Bulow home in Long Beach, and a trip to a house at 743 South Mesa street, San Pedro, which Bulow is said to have pointed out to Mrs. Moores as his home and where officers discovered Paul Brackman and W. A. Martin, two friends of Bulow, who are said to have known of his asserted double life.

On Saturday afternoon and again Saturday night Bulow failed to show up for an appointment with Mrs. Moores at her home on East Twentieth street. Becoming alarmed, Mrs. Moores got in her car and started to the house of a friend in Long Beach where she and Bulow had often met before.

While on the way a car passed her, which she recognized as belonging to Bulow. She says that she did not, at the time, discover that anyone was with him.

After pursuing the car, however, and calling out to him to stop, which he did, she then saw a woman in the seat with him.

Bulow and his wife got out of their machine, she says, and advanced toward her car, he with a pistol in his hand. She then asked him who the woman was, and he told her his wife.

WIFE SOUNDS WARNING

Mrs. Bulow is then said to have warned her that she must stay away from another woman's husband or something "would happen to her."

Accusations followed, and Mrs. Moores asserts that Bulow fired four shots at her, each of them striking her car. None took effect, however, and, fearing to be killed, she seized a small pistol which Bulow himself had previously given her with a warning to protect herself from possible "dangerous men," and fired one shot.

Bulow then started back towards his car, and she says that she cried out to him, "Walter, where are you going?"

He said, "To the doctor," and got into the machine with his wife and drove away. After that Mrs. Moores says that she does not remember anything.

Her father, Daniel Mulhearn, who is reported to be a well-known contractor of Long Beach, is persuaded that there was a third woman in the case, and is urging

(Continued on Second Page)

## RAINFALL LAST YEAR ECLIPSED

**APARTMENT TO COST \$600,000**

Eight-Story Building for Sixth and Park View

City Plans Erection of Two Firehouses

New Office Structure at Seventh and Central

Construction work will soon be started on an eight-story, class A apartment-house, which is to be located on the southwest corner of Sixth and Park view streets.

The building will have a frontage of 120 feet by 150 feet, and will contain 250 rooms, which will be divided into two and three-room apartments. It will be strictly modern throughout, containing wall beds, built-in conveniences of every sort, a central vacuum cleaning machine connected with every room, tiled bathrooms, hardwood floors in every part of the building, and the most up-to-date steam-heating system.

It will be of reinforced concrete construction, and the exterior is to be finished in terra cotta and pressed brick.

**BUILDING TO COST \$600,000**

The plans have been prepared by Architects Walker and Elean, and the construction work, which will start no later than January 15, is to be done by the Lamm & Bergstrom Construction Company, which will own the building. The cost will be in the neighborhood of \$600,000.

A two-story apartment-house is soon to be built on the corner of First and Kenmore streets for E. Lohke, of 1971 South Catalina street. It will contain twenty apartments, and will be built at an estimated cost of \$75,000. The plans are being prepared by Architect E. H. Reed, 317 Black Building.

Two firehouses are to be built by the city in the near future. One, to be located at 1137 West First street, will be a two-story brick structure, which will cost in the neighborhood of \$45,000. It will house one fire-fighting unit, and will provide sleeping quarters for the men in the second story. The other is to be located at Gardner Junction near Sunset Boulevard.

**BUNGALOW STYLE**

It will be bungalow style, and will cost about \$25,000. These two fire houses are being built to fill, in some measure, the immediate need of the western portion of the city, for additional fire-fighting equipment and units.

Plans are being prepared for a three-story office and store building, to be erected on the northeast corner of Central avenue and Seventh street. The building will have a frontage of 220 feet by 250 feet, and will accommodate twenty-one stores on the ground floor and eighty offices on the second and third floors. The site is owned by the Cohn-Goldwater Company. The plans were drafted by Architect C. Rittenhouse, and construction is to start immediately.

**BAY CITY SHIP MAN DIES HERE**

Friends Unable to Obtain Medical Attention for Victim of Plomaine

John J. Furey of San Francisco died of plomaine poisoning early yesterday morning at 344 Santa Cruz street, Los Angeles Harbor, following three unsuccessful attempts on the part of his friends to obtain medical assistance from the police station in that city.

This information was given out yesterday morning by Capt. Clyde L. Plummer, of the Central Division, who appeared to be incensed over the lack of adequate facilities there. Mr. Furey, who was 40 years old and whose widow lives at 124 Clipper street, San Francisco, was prominent in shipping circles in the northern part of the State, suffering intensely from having eaten contaminated food, he went to bed early Saturday evening and at 10 o'clock his friends found him and telephoned to the police station for a physician.

Dr. Morris Robbins, who was detailed to the case, arrived a little after midnight and found Furey dead. Dr. Robbins said he was slightly delayed because he had been compelled to make other calls before attending to Furey's case.

The body is at the Goodrich funeral parlors. Coroner Naves will conduct an inquest there today.

**CAPT. FREDERICKS TO TALK ON ORIENT**

WILL ADDRESS MEETINGS CLUB AT NOON MEETING IN ALEXANDRIA

The meeting of The Electric Club today noon at the Alexandria ballroom, will be known as oriental day. Capt. John D. Fredericks, president of the Los Angeles Chamber of Commerce, who recently returned from a trip to the Orient, will be the principal speaker and will talk on "Conditions in the Orient."

One of the club members will impersonate a Chinese statesman, while an oriental dance number will be provided, together with some oriental songs by Miss Eleanor Gay, the famous dramatic soprano, who is now appearing at the Kinema Theater in connection with the photoplay "East is West."

**BRUSH FIRM'S LOCAL MANAGER PROMOTED**

The sales force of the Fuller Brush Company had a meeting on Saturday night at the Union League Club, at which several promotions were announced by W. H. Metcalf of Oakland, manager for the western division.

R. E. Bloom, who has been in charge here, goes to Oakland as manager of the California district, including Arizona and Nevada. Several local managers were named. About 125 were present at the gathering.

**NEW LINES IN APPAREL ARE NOVEL**

Three-Piece Suit Drives Three-Piece Suit Drives Gazers at Fashion Revue of Grotto Circus

More men with his three-piece suit of coat, vest and trousers is to have nothing on his feminine equal, for the three-piece suit for women threatens to be the rage for Angelenos' women's wear for midwinter and early spring.

Such is the dictum outlined by Kathryn Campbell, well-known style authority, who is supervising the Goodman fashion revue that diversifies the feminine attendance at the Grotto Circus, while the eternal masculine is attracted to the W. H. Rice bathing girls, the Shirley Lewis "Follies of Los Angeles," and Edythe Sterling, the "Maine Buffalo Bill."

The three-piece suit comes in two ways, according to Miss Campbell, either skirt, blouse and jacket, or the one-piece dress with the short jacquette, which gives the same effect. This circular skirt with side drapes is most popular for street wear with the bottom of the skirt from three to seven inches from the ground.

Capes are unusually popular this year, while fur-trimmed as well as coats. The materials used are gerson, marvella, tarquina and pavelaine, while the sought-after furs are beaver, ermine, mink, fox and caracul. Popular suitings include marleen, valdyne and twill cords.

Dresses come in velvet, flat crepes, Polart twills and Canton crepes, while for evening wear the metallic and beaded fabrics are in strong demand.

The popular shades of the season are Landrin green, Hollywood brown, Malay, sand, African, navy, black and Rappala blue. For sports wear sweaters which are favored, the new mode in skirts running to camel's hair in natural tan shade, while the sweaters are of brushed wool, pure silk and fiber silk. Dandelion and sand are the fashionable shades for sweaters, says Miss Campbell.

**ILLINOIS MEETING**

Society Will Have Entertainment and Election Wednesday

The annual business meeting of the Illinois Society will be held Wednesday in the Rhell clubhouse, Eighteenth and Figueroa streets. James A. Tomlinson, president of the organization, announced yesterday.

Officers for the ensuing year will be elected. Dancing and music will feature the program. E. M. Robies will play a guitar solo. Miss Zenora Throop and Miss Charlotte Ortiz will dance the minuett. Little Jeanne Webb will give a vocal solo and yodel. A violin number will be played by Miss Stella Huggins. Wynetta Stead will whistle, and the program will be concluded by a vocal solo by Miss Geraldine Wade.

**YOUTH HELD FOR FORGERY**

By a "Times" Staff Correspondent

VENICE, Dec. 10.—Ralph Anderson, aged 19 years, a native of Colorado and former resident of Ontario, is being held in the Venice jail on a charge of forgery. He is said to have admitted forging a check for \$55, here, which caused his arrest, and also one of \$25 in Ontario.

**GROWERS PLAN CHANGE IN LAW**

New Plant Quarantine is Needed in State

Farmers and Fruit Men to Meet This Week

Plans Will be Discussed to Better Shipping

Radical changes in the California plant-quarantine methods to meet a new condition will be discussed at the fifty-fifth annual fruit growers and farmers' convention to be held Tuesday, Wednesday and Thursday at Sacramento. It is pointed out that the new steamship line from Los Angeles to Hawaii and the automobile travel from other States are likely to introduce plant pests foreign to California. Lee A. Strong, chief of the Bureau of Plant Quarantine of the California Department of Agriculture, will present facts regarding this problem.

H. J. Ryan, Horticultural Commissioner of Los Angeles county, urges it upon both fruit growers and farmers, as well as shippers and others vitally concerned, to attend the meeting.

Upon the suggestion of Gov. Hart of Washington, the American Association of Agriculture of California has issued invitations to other Pacific Coast States to have delegates present at this convention. It is hoped that from this meeting may come a strong Pacific Coast organization for the purpose of presenting to the Interstate Commerce Commission the needs of the shippers throughout the Western States in a more effective way.

William Sprague, president of the Southern Pacific, C. H. Sechrist, general manager, Pacific Fruit Express, and other railway officials will present the viewpoint and problems of the transportation companies.

The matter of plant quarantine, which at this time is receiving special attention from grove owners and horticultural officials, will have a large place on the program.

Because of the fact that this is a legislative year there will be several matters discussed which will be of direct concern to grove owners and shippers, relative to proposed amendments to the horticultural statutes.

**BURGLAR SUSPECTS NABBED IN CHICAGO**

By a "Times" Staff Correspondent

LONG BEACH, Dec. 10.—Long Beach police have been notified that Mrs. Elsie Matmuller and her son, Valdemar, of Naples, near here, are under arrest at Chicago on charges of burglary. The pair, with another son, were arrested in Long Beach last summer, following a series of burglaries in this city. The local police gave the Matmuller boys the name of "ax burglars" because of their asserted method of operating.

At the hearing in Justice Court here Valdemar Matmuller was held to the Superior Court for burglary and the mother and other son were released because of insufficient evidence. In Superior Court Valdemar obtained his release on a plea of insanity, according to local police. They left for Chicago soon after the youth's release.

Several thousand dollars' worth of stolen property were recovered by C. F. Fetherston, detective sergeant, following the arrest of the trio here.

**Cool Burglars Do Leisure Job in Apartment**

One of the coolest and most leisurely jobs of burglary that has come to the attention of the police department in some time was reported yesterday morning by H. B. Davis, the proprietor of an apartment house at 916 West Sixth street, who says that furniture thieves visited the lobby of the apartment Saturday night and made practically a clean sweep of the room.

The following articles are reported to be missing: one mahogany floor lamp, one piano stool, one upholstered chair, one glass vase, six rugs valued at \$300, one table scarf, one mahogany wall clock and a man's hat.

Davis says that he knew nothing of the robbery until yesterday morning when he came down for the day.

**OREGONIAN HELD; FORGERY CHARGED**

C. H. Nelson was arrested yesterday by Dep. Sheriff Fox on a criminal warrant from Oregon City, Or., charging forgery.

Nelson is accused of having signed a check for \$498 for a woman who could neither read nor write, and of having appropriated the money for himself.

## People and Their Troubles

### Listen, World!

WRITTEN AND ILLUSTRATED BY CLOS ROBINSON

One of the healthiest signs of the present age is the fact that the young people are no longer regarding each other's most trivial acts as signs of "serious intentions." I realize that there are many who deplore this fact, but why should they? There is really a great deal of work for men and women to do together outside the business of matrimony. Marriage is undoubtedly the most beautiful partnership a man and woman can enter into, but there are other partnerships and contracts, quite outside the business of sex which contribute to the prosperity and happiness of the world. And so I think it's a very good thing that Henry's sign and Mabel's first blush are no longer regarded as matters of awful consequence.

The more young people learn to play and work together without romantic intention, the better world we'll have and the easier the road when the youngsters get around to the business of making homes. It isn't pure or beautiful to insist that young people should be guided from each other until the love-making time arrives. It isn't intelligent or clean to suggest motives in every encounter. It's ignorant and quite a bit nasty. It shoves humanity down to the level of the gophers and hog heads whose only association comes through mating. Humans have infinitely more complex duties and need a wider, more impersonal training than that of even the most select sows from the best families.

The world has suffered greatly from the savage sexual fears which have cooped its young women away

from its young men. Women need the tolerance, sportsmanship and pulse which association with men can give them. Men need the reason and the sense of humor which young people should be guided from each other until the love-making time arrives.

ment, tenderness and idealism which association with women can give. And these things can best be learned in an atmosphere of happy play, healthy competition, and good-natured witicism, uncomplicated by the embarrassment of the "serious intentions" which are so often the result of the "love-making" time arrives. It isn't intelligent or clean to suggest motives in every encounter. It's ignorant and quite a bit nasty. It shoves humanity down to the level of the gophers and hog heads whose only association comes through mating. Humans have infinitely more complex duties and need a wider, more impersonal training than that of even the most select sows from the best families.

### Questions Answered

(Any reader can get the answer to any question by writing to the Editor, Los Angeles Times, 121 N. Main St., Los Angeles, Cal. The question must be clearly stated and must be self-explanatory. All questions are sent direct to the Editor.)

Question: What are Fascists?

Answer: Fascism is the name given to the members of a scattering, voluntarily organized movement formed in Italy in 1919 to offset the work of the Reds. They have no definite program, and are of widely different political views, merely being bound together by a strong national spirit. The name was taken from the Latin "fascia," the Roman emblem of an ax in a bundle of rods. It was adopted as their official sign. Their object was to counteract the designs of the extreme Communists and Socialists. They are reported to have organizations in all towns of Northern and Central Italy.

Q: What should hospital floors be made of?

A: A recent report made to the American Hospital Association gave first choice to reinforced rubber, terrazo in blocks; second choice, battleship linoleum, concrete, integral hardener and coloring; third choice, soft mastic.

Q: How large are the California oil fields?

A: The California oil fields cover about 400 miles long. The largest field is in the Central Valley, but there are many others in the southern part of the State.

Q: What are the largest fish that have been caught with rod and reel?

A: The record tuna of 251 pounds and the black sea bass of 135 pounds were taken with rod and reel and 21-strand line.

Q: What are the record horseback riders?

A: Robert M. Hadam, "Foxy Bob," and William F. Cody, "Buffalo Bill," as riders for the Pony Express made continuous rides of 180 and 184 miles, respectively, without stopping except for meals and to change horses.

Q: When was electricity first produced by water power?

A: The first hydroelectric plant in the world was operated at Foxton, Cal., a few years later, 1894, and the first commercial plant of that kind was established at Niagara Falls, N. Y., in 1895.

Q: Are ordinary buttons patentable?

A: That would depend upon the button, but there have been about 1500 patents for buttons issued by the Patent Office of the United States.

Q: What State is known as an "Island on Land"?

A: California has been so called because of the fact that climatically it differs altogether from its neighboring States.

Q: How large are the California oil fields?

## The BEACON Gas and Electric GIFT NEWS

Published by Beacon Light Co., in the interests of Sensible Giving

**SUGGESTIONS** for appropriate Christmas gifts for you on all sides these days, and our voice is many. Doesn't it seem, though, that gas and electric appliances really do stand for common sense, for good and for faithful service in lightening the burden of fellow beings—precisely those thoughts most associated with the true spirit of Christmas?

### Here's a Wonderful Gift!

#### Electric Percolator Set

Urn Type Percolator \$15 up  
Troya, Gramme and Sugar Bowls \$2.45 up

#### A Gift of Comfort

Electric Warming Pad \$6.50 up  
Give "HER" an Electric Curling Iron \$3.50 up

### Light Your Tree Electrically

The Safe Way. The Sensible Way. Beautiful sets of colored lights, easy to install. May be plugged in at any time socket. No danger of fire. \$2.50 up

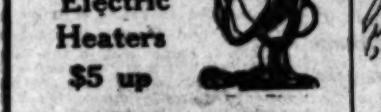

Electric Flash Lamps \$1.00 up

### A New and Different Gift for "HIM"

**Electric Shaving Set**  
Here's a live tip for you ladies who had to wait so long for a gift for your husband, father or sweetheart. The set includes a complete electric shaver with a razor, a safety razor, extra blades in a special container, cologne, brush, soap with metal container and a special gift box. All this is enclosed in a beautiful metal case which fits easily in a man's coat pocket. It has a hard, smooth, leather-like cover. \$7.50

### Practical Gifts For Wife or Mother

**Electric Heaters** \$5 up  
**Electric Irons** \$3.95 up

**Electric Percolators** Regular Type \$7.50 up  
**Electric Waffle Irons** \$12.50 up

**For Christmas Cheer**  
The wholesome warmth of a Humphrey Radiantfire is more essential than the Christmas tree. Prepare for the holidays by equipping your home with Humphrey Radiantfire Heaters.

Make sure of a full selection to choose from. Visit our store early this week.

### LETTERS TO THE TIMES

It's the System

LOS ANGELES, Dec. 7.—[To the Editor of The Times:] I have read your editorial in this morning's Times, "Irish Home Rule." I think it an especially good one and timely, and my only disappointment is that you did not give the government of Ulster a little send-off.

Ever since I have been reading American editorials on the Irish question, England and especially the people of Ulster have been blamed for what has gone on in the south and west of Ireland. The government of Ulster has put its house in order and has settled down to work out its serious problem of a livelihood, while the Free State is spending a million dollars a day of borrowed money in killing each other off and destroying the resources of the country.

Thanking you for your editorial and hoping that you will pardon me for my intrusion, I beg to remain,

JOHN E. CRAIG

As a Negro Sees It

NOGALES (Ariz), Dec. 6.—[To the Editor of The Times:] After reading an article in your very interesting paper entitled, "The Barrier of Race," by Mr. M. W. Richardson (white) would it not be fair and even interesting to publish the views and conclusions of a proud member of the colored race on the same subject?

The mixture of races between whites and colored is a two-sided question. A legal agreement can not be accomplished for any person or race, that is where both parties are concerned. For instance, Mr. Richardson has declared himself to be my partner, humorously ignoring the fundamental necessity of consulting me. Mr. Richardson has jumped at the conclusion that colored men are inferior to intermarriages with whites, from the statement of some shallow patred irresponsible negro. Such conclusions expose the ignorance, not only of Mr. Richardson but of 99 per cent of his race. Such gross ignorance is caused from the fact that the whites instead of studying the colored races from a general standpoint, confine such studies to imbecile individuals. Mr. Richardson firmly believes that the statement made by this man of ill-repute voices the sentiment of the negro throughout the world. Such conclusions are erroneous, misleading, deceptive and mean.

### ZAGZA ACCEPTS INVITATION TO MEET WEST VIRGINIA GRID TEAM

#### SAN DIEGO WILL STAGE CHRISTMAS DAY BATTLE

**Invited Mountaineers Elated Over Arrangements for Tilt With Spokane Squad**

(EXCLUSIVE DISPATCH)  
SAN DIEGO, Dec. 10.—The Gonzaga University of the West in the intercollegiate football game with the University of West Virginia eleven here on Christmas day. This was the definite word given out today by the committee of the Chamber of Commerce, which is sponsoring the game.

#### SAN DIEGO CRAVES TO PLAY HOME

**Southern California Title Winners May Meet Drillers in Big Stadium**

(EXCLUSIVE DISPATCH)  
SAN DIEGO, Dec. 10.—The management of the San Diego High football team, which won the Southern California interscholastic grid title by defeating Gardena High at Los Angeles yesterday, is making a determined effort to induce the Bakersfield team, champion of the San Joaquin Valley section, to play here in the stadium next Saturday in the semifinal game for the State prep football championship.

Manager Allen McGraw of the San Diego high eleven telegraphed the Bakersfield grid team authorities today requesting that in view of the fact that the locals had had a hard schedule this season, having to play four of their games abroad, that the title be played here. Should the Oil Drillers decline to grant the local squad's request, San Diego is willing to meet Bakersfield in Los Angeles.

John J. "Commodore" Perry, San Diego coach, stated that under no considerations would his team go to Bakersfield to stage the tilt. Perry continued that he was tired of having to take his eleven away from home to play important play-off games.

#### Jack Dempsey Will Second Joe Benjamin

Joe Benjamin will make his first appearance at Doyle's Vernon arena in several months tomorrow night when he battles Phil Salvador, the star local lightweight, in the feature attraction. Teddy O'Hara, the Oaklander, who had been going so good up until the time he met Benjamin, was on the losing end of a sensational scrap that was settled by a sleep-producing wallop. Salvador has been doing some wonderful work in the ring for the past few years and should give Benjamin a tough battle.

Champion Jack Dempsey has consented to act as Benjamin's second tomorrow night. With the big boy in his corner Benjamin will be given some sound advice that might win for him the medal.

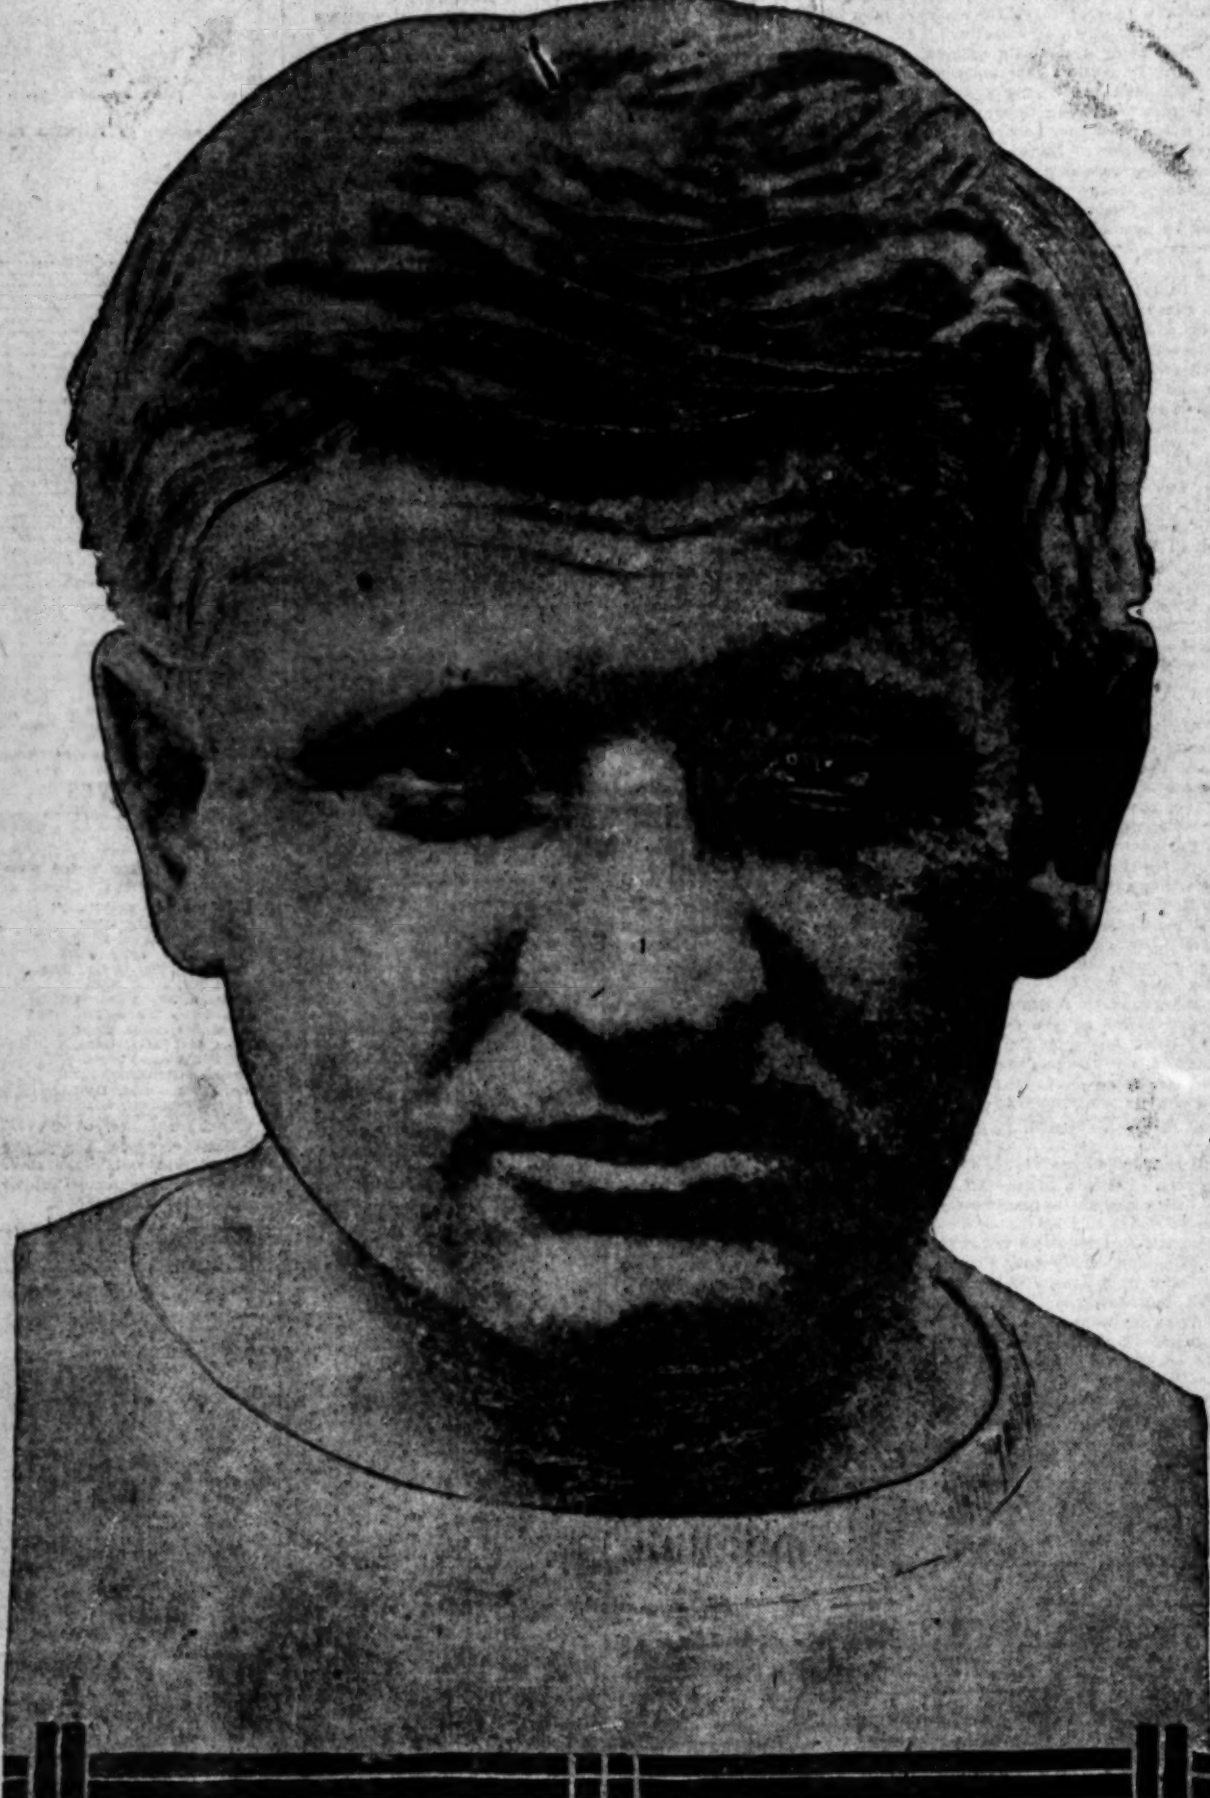

Salvador, the San Diego star with the wallop, will clash with Mack House, the colored slugger, in the semi-windup. Matchmaker Wad Wadhams has arranged a special event spot for Salvador Ashmore and Young Papke. Other bouts arranged follow:

**MORVICH AT STUD**  
(BY A. P. NIGHT WALK)  
LEXINGTON (Ky.) Dec. 10.—Morvich, winner of the 1922 Derby and undefeated as a two-year-old, arrived from New York yesterday afternoon and was taken to the Haylands farm, where he will make the season in stud.

**TROJANS START WORK TUESDAY**  
Word was received here last night from "Gloomy Gus" Henderson, who is in Seattle attending the Pacific Coast Conference meeting, that the University of Southern California eleven would start actual practice Tuesday, December 12, in preparation for the big game with Penn State at Pasadena on New Year's day.

Henderson said his team would be proud to represent the West now that it had defeated the other conference schools backing "Gloomy" added that U. S. C. was fortunate in lining up a good grid schedule for 1923.

### The Gray-Haired Boss of the Nittany Lions

Hugo Bezdek, the Man Who Has Made Penn State Famous  
An intimate close-up study of the man who will attempt to beat U.S.C. at Pasadena New Year's Day.

#### JENKISSON WILL TAKE ON DRAKE

**Feature Boxing Event at L.A.A.C. Next Thursday Night Is Promising**

A pleasant surprise is promised the patrons of the boxing card that will be staged at the Los Angeles Athletic Club next Thursday night. Charlie Jenkisson is the person who is doing the promising and he means to demonstrate that he is now fighting as well as when he won the national amateur welterweight crown two years ago.

Jenkisson has been inactive in the ring for over a year, with the exception of his tilt a few weeks ago with Sailor Linton. Since that time he has been in strict training. He has hopes of duplicating his triumph of a couple of years ago and he is gradually getting primed for the national amateur boxing tournament which will take place early next spring.

Thursday night, Jenkisson will box Floyd Drake. The latter has made a big impression in both of his scraps here, and Jenkisson will have to travel a championship clip to gain a victory. In his work-out Jenkisson has shown much of the old snap and power that helped him gain his title and he is now in excellent condition.

The complete program:  
First round: Harry Graham, 125 pounds, vs. Jack Morris, 125 pounds.  
Second round: Ned Green, 135 pounds, vs. Charlie Jenkisson, 135 pounds.  
Third round: Ray Davis, 145 pounds, vs. Al Thompson, 145 pounds.  
Fourth round: Al Thompson, 145 pounds, vs. Ray Davis, 145 pounds.  
Fifth round: Al Thompson, 145 pounds, vs. Ray Davis, 145 pounds.

#### NITTANY LIONS AND PANTHERS GET ON EDGE FOR FOOTBALL CONTESTS IN WEST

(EXCLUSIVE DISPATCH)  
PITTSBURGH—Dec. 10.—The two Pennsylvania football teams that will visit California this month—University of Pittsburgh and Penn State—were given a rest last week, after a strenuous season, but beginning with tomorrow each squad will be put through a light training schedule by Glenn Warner at Pitt and Hugo Bezdek at State.

The Pitt Panthers will leave Pittsburgh on Saturday, December 11, arriving at Palo Alto at 10 a.m. There will be no stopovers, except two hours only at Chicago on the 24th, but Warner will have special training devices installed on the train of Pullman that will take the bunch to the Coast. With two and a half days to get their "sea legs" again before tackling Andy Kerr's team at Leland Stanford, the Panthers will be ready to show the Coast fans what Father Pitt has to offer. Nine of the team are products of Greater Pittsburgh High schools, viz., Clark, Back, Seidelson, Evans, Holleran and Murdoch. The following players will wind up their college football career in the Palo Alto game: Simpson, Clark, Bower, Williams, Winterburn, Anderson, Hewitt, Miller, Holleran.

**WILL STAY ON COAST**  
It is likely that Glenn Warner will stay on the Coast for the rest of the winter, coming back East about April 1 to his home at Springfield, N. Y. Two years hence he will transfer his family and belongings to California, more than likely for the rest of his life, as he will take charge of the University of Leland Stanford, and as he is getting up in years he will

hardly come back East except on a pleasure trip. The Pitt Panthers will be taken to Pasadena the day after their game with Stanford, and will witness the game between Penn State and whatever team is chosen as their opponents. They will be back at the university when the next semester begins. The whole Pitt party will be made up as follows: Players Sauer, Simpson, Clark, Bower, Back, Gourley, Williams, Winterburn, Flanagan, Anderson, Hewitt, Jordan, Frank, Miller, Ashbaugh, Hangartner, Seidelson, Gwosden, Shuler, Bohren, Evans, Holleran, Holleran, Johnson and Murdoch. In addition to Coach Glenn Warner there will be Assistant Coach Floyd Rose, Director of Athletics Charles E. Miller, Graduate Manager Karl E. Davis, Student Manager George Carson, Dr. "Hub" Wagner, the club physician and former full-back and captain; Ollie De Victor, trainer, and Ralph S. Davis, press representative.

**CUTLER IS HERE**  
Among the critics at the Pitt-Penn State game on Thanksgiving Day was John W. Cutler of the New York Sun, who had this to say of "Tiny" Hewitt, who has been chosen on the first all-American team by many eastern writers: "Hewitt was selected to assume the entire burden of rushing the ball in the first half, a chore which he eagerly and most aptly accepted. This Panther repeatedly bore through the line of the Staters and his efforts were rewarded by compound yardage. He is a real star, and his performance marks him as a line-plunger who must be considered along with John Thomas of Chicago, Jordan of

#### HONOLULU HAS CORKING SQUAD

**Hawaii Varsity Leads Can Sure Go Some**

**Grids to Play Pomona During Holidays**

**American Eleven Expects Tough Battle**

(BY CABLE-REUTERS DISPATCH)  
HONOLULU (T. H.) Dec. 10.—University of Hawaii, which plays Pomona College here during the Christmas holidays, has developed one of the best football teams in island history and which is expected to give the Pomona a hard battle.

The University on November 25 held the big and power Navy team to a score of 13 to 10, outplaying the "gobs" for the greater part of the game but in the last quarter succumbing to the superior weight of their opponents.

The university is made up of youngsters and is only medium in weight as college football teams go. It has a fairly stiff line, with a lot of fight in it, a fast and tricky backfield, a punter who, while inexperienced, has recently been showing plenty of long, high sprays, and a fairly good assortment of plays. Its defense and offense are evenly balanced. It has not shown any great variety of attack so far this season but as it has two weeks of training before the Pomona game, it should master several new lines before the Californians arrive.

The Navy team is considered as good an aggregation as was ever developed here. Last year it was the best in the islands but many fans believe that the team is a better scoring machine than last year. In 1921 it had more stars; this season it has better, smoother team work and still is not lacking in stars. "Doc" Wilson, a fleet back, was a star with Georgia Tech some years ago and "Woe" Gates, who can kick, run the ball, shoot a forward pass or receive one is a sailor boy who would have been a sensation had he had the good luck to be in the squad of some big university.

#### TIJUANA RESULTS.

(EXCLUSIVE DISPATCH)  
SAN DIEGO, Dec. 10.—Buchhorn II led a field of five under the wire to win the feature event of the day at Tijuana, a handicap at a mile and seventy yards. Tailor Maid nosed out Hahn, the favorite, while Capt. Clover, who scored his first victory of the season yesterday, was unplaced.

Buchhorn trailed in the stretch and there rapidly overhauled Hahn and Capt. Clover, both of whom had set the pace and were tired when the real test came.

The rains of the past few days made the track very sloppy. Results:  
First race, six furlongs: Chick Butler, won; Eddie Burton, second; Calumet, third. Time, 1:09 4-5.  
Second race, six furlongs: Al Porter, won; Mitt, second; Gracie, third. Time, 1:20 1-5.  
Third race, one mile: Harry D., won; Mitt, second; Bill White, third. Time, 1:34 1-5.  
Fourth race, one mile: Eddie Burton, won; Mitt, second; Bill White, third. Time, 1:34 1-5.  
Fifth race, one mile: Eddie Burton, won; Mitt, second; Bill White, third. Time, 1:34 1-5.  
Sixth race, one mile: Eddie Burton, won; Mitt, second; Bill White, third. Time, 1:34 1-5.

**CHERRY LEAGUE**  
(EXCLUSIVE DISPATCH)  
BOSTON, Dec. 10.—Boston hosts a Metropolitan Cherry League with seven teams. Collegiate and club experts will participate in weekly matches.

#### TWO SEMIPRO PENNANTS WON

**Angels Club Cops Title in Fast Edison League**

**Takes Deciding Game From Vernon Aggregation**

**Grinnell Team Nabs in Plumbers' Circuit**

Before a crowd of 800 spectators, "Little Napoleon" Benton led his league-leading Angels team to their seventeenth straight win, clinching their hold on first place for the Edison league championship.

It was a real ball game with "Daddy" Reynolds and Campbell in the leading roles. Reynolds was hit more freely than Campbell but held the Vernons helpless in the pinches, while his team mates were hitting Campbell when his meat runs.

After two were out in the third, Carpenter singled and Howard connected for a home run over the right-field fence. After that the Angels were never in danger. The all-around work of Carpenter at short was easily a feature, while Andrus and Grimes starred for the losers. The score:

Angels	Vernon
1	0

9	0
Total	0

The Grinnell Company ball squad nabbed the pennant in the Plumbers' League by defeating the Crane Company squad, 5 to 4, after an exciting game played Saturday at Rose-Burke Field. Crane tied the score in the ninth, but the Grinnell players came back in their half of the final frame and won out. A triple by Grimes, following a single by Thompson defeated the Crane men.

Bibley pitched for the winners and twirled a good game. Hevris opposed him and clucked just as well but was given poor support by his team mates. The victory made it nine wins and no defeats for the Grinnell aggregation. Score:

Grinnell	Crane

Center	Center	Center	Center
Right Guard	Right Guard	Right Guard	Right Guard
Right Tackle	Right Tackle	Right Tackle	Right Tackle
Right End	Right End	Right End	Right End

CHICAGO, Dec. 10.—Back in the late eighties the custom of selecting honorary football eleven to reward players for sterling work during the season was established, and since that time these selections have been looked upon as established institutions and are looked forward to not only by players and coaches, but by those closely identified with the game.

These selections are only a meager reward for the players who have risked serious injury to uphold the honor and tradition of the college and university they represented. Unlike the professional athlete, the college football player is not remunerated in the monetary sense. At the close of the season he is given a sweater with the letters of his institution sewed on the front. It is practically the only thing which he can carry through life as a memento of heroic play on the chalk-lined field.

### HIGHEST OF HONORS

To the player who has given everything on the gridiron that his alma mater may still rank with the leaders of the section in football, his selection for a position on any honorary eleven is cherished. This is more so in his college days than in after life. The fact that this general play was appreciated by numerous critics is the source of great satisfaction and in a large measure responsible for his forgetting about injuries received during the playing season.

In recent years, the western conference has developed the majority of players who have been chosen for all-western teams. With the exception of Notre Dame and teams in the Missouri Valley Conference, other institutions seldom develop players who stand out as prominently as those in the Big Ten. In a large measure, lack of support which good players on small teams receive is the reason.

Development of high-class performers in the conference is due to the superb coaching and training of the men. The smaller institutions cannot pay the price for expert coaching and neither can they afford to engage an experienced trainer. This is a great handicap and as a result many players who are injured early in the season seldom round back into form during the remainder of the year.

### TWO POSITIONS CHANGED

In the selection of an all-western team, only two positions have been changed from the all-conference team chosen a week ago. In fact, there was a scarcity of players who matched up with the starting performers of the Big Ten which enjoyed a most successful season from the standpoint of attendance and equality of combatting eleven.

Weller of Nebraska, one of the best tackle players in the conference, was chosen for left tackle. This player has been one of the mainstays of the valley eleven for the last three years, and there is little about the position which he cannot do a bit better than other tackle in the Middle West. Weller is a giant in stature, fast and active for a player of his size. When Nebraska was beaten by Syracuse, Weller was the only player who performed consistently throughout the struggle.

### NOTRE DAME MAN

Degree of Notre Dame is placed at right guard. The Hoosier is a veteran and knows the general play of the position thoroughly. Following the injury to Paul Casner, which took place in the Butler game, Degree was called upon to do the punting and did it in a most creditable manner. In the Nebraska game it was his superb punting which prevented Notre Dame from being beaten by the Hoosiers. In this struggle, Nebraska made but few gains over him, although the Cornhuskers employed a brutal line leading attack.

Two sterling players have been given positions on the second eleven. Capt. Hahn of the Kansas Aggies was one of the outstanding guards in the Missouri Valley Conference. He had the respect of every team which the Aggies faced and was a tower of strength offensively and defensively. Coaches of other teams in the valley, including Fred Dawson of Nebraska, asserted he was unquestionably the best guard in the section. He worked over 190 pounds and played aggressively throughout the season.

### BOELTER OF DRAKE

Boelter of Drake, one of the best backs west of the Mississippi River, is awarded a backfield position on the second eleven. This player was one of the reasons why Drake went to the season undefeated and secured an early lead over its opponents. He ran the end, drove off the tackles or hit the line with equal success. Defensively he was one of the best in Drake football history.

Joseph "Red" Dunn of Marquette is placed at quarterback on this eleven. Marquette enjoyed a successful season and Dunn was largely responsible for its record. The star of the Cream City College team was an accurate field goal kicker and his uncanny ability to drive the ball between the posts from difficult angles made him a respected performer.

Scherrer of Nebraska is awarded an end position on the third eleven. The Cornhuskers are generally considered to be the strongest team in the Missouri Valley conference, and Scherrer was a great help in winning this honor. He played consistently all season but against Syracuse and Notre Dame played his best game.

### Capt. Hartley of Nebraska Is Star

Joe Chynski plays no favorites. He is equally frank in his statements regarding the honors of the past as well as those of the present. The writer always has maintained that Stanley Ketchell fall short of real ring greatness, maintaining that his open style would make him an easy mark for a clever man of the Langford type who could punch hard and straight.

This being a minority opinion, it was rather pleasing to me for a man of Chynski's experience to express a similar estimate. "Ketchell and Young Corbett were both tremendously overrated," declared Chynski. "Ketchell was too open. Young Corbett was a very poor boxer for a champion. I'll tell you why he beat Terry McGovern. He was the first man Terry met who could really hit. McGovern was a rushing, tearing fighter with little or no defense. He simply stepped into it."

"Whatever ability Young Corbett possessed was in a measure nullified by lack of condition, plus what perhaps was a natural tendency to take on unwholesome weight."

An interesting communication from Attorney George C. Watson: "The writer has recently heard diverse observations from eastern gridiron heroes, as well as loyal alumni of eastern, midwestern and far western universities, as to whether the real test has been applied to the matter of post-season, inter-sectional contests. Washington and Jefferson last season demonstrated that it is not necessary to change the results of classic conditions, but two important questions remain unanswered:

"First, how would California, U.S.C. or Oregon fare breasting into Chicago, Pittsburg or Princeton about the latter part of October?"

"Second, how would Pittsburg and Nebraska be received in a game in the Pasadena Stadium about December 15?"

"Booner or later the far western teams, to justify their claims to football tactics, must invade the air of the Titan, the Bulldog, the Lion, the Panther and the Wolverine, and before a critical, unympathetic multitude, far from their sunny western slope, demonstrate what the West has been claiming for years."

"There is not the slightest doubt in the writer's mind that a game played either at San Francisco or Los Angeles between two representative teams of the East or Middle West, would not only prove justifiable, but interest to a superlative degree."

### Unquestionably football players and other athletes are affected by climatic changes.

Ohio wintered under a warm winter day. W. and J. played under weather conditions similar to fall in the West, and the Presidents were at top speed throughout.

For a western team to invade the East would be desirable. The chief difficulty lies in the fact that the weather back there usually is too far advanced to permit of post-season contest, and the distance makes the arrangement of such a game during the regular season largely impracticable.

However, California contemplated such an invasion in spite of these handicaps, and immediately following the Ohio game challenged Harvard, Yale and Princeton for the following season. There was a triple refusal based on the explanation that the schedules were already filled.

Admitting that Eastern teams playing here usually are under a climatic handicap, yet our track teams, baseball clubs and rowing crews participating in the East perform under the same unfavorable conditions, and the records show that they have done right well.

There is no doubt that two representative Eastern eleven would draw heavily here, but it is doubtful whether two universities could be found willing to consent to such an expedition.

Mr. Watson goes Walter Camp one better, and is even more venturesome. He is a unique All-American eleven. Undismayed by the fact that there are approximately 400 colleges and universities in the field, he essays to pick the eleven best teams, under the heading of the "Great All-American" as follows:

Princeton, California, Cornell, Iowa, Michigan, Yale, Pittsburg, University of Southern California, Notre Dame, Nebraska, West Virginia.

Sub-eleven—Harvard, Chicago, Oregon. The writer wants to know if there is a chance to escape the yoke of wrath. I doubt it considering the large amount of alumni scattered over the landscape, and as all know who have monkeyed with all-star eleven, the average alumnus, when sufficiently provoked, doesn't fool with a mere yell, but alights it, real high gravity wrath, from the lower levels of his outraged feelings.

Since Dempsey adherents insist that a Dempsey-Willard match is too poor for domestic consumption why import something several grades poorer in the shape of a Dempsey-Beckett match? No difference how bad Willard may have been at his best, or how far he has gone back, he is far better than Beckett—would be as good if he lost an arm—Beckett, a man knocked out in a punch by the almost pathetic Carpenter, who was whipped by little Billy Papke after the latter had passed his prime. "I hope nobody bumps Beckett off before he reaches me," Dempsey is quoted as saying. Any promoter who would arrange that match and bill it as a fight should be arrested for obtaining money under false pretenses.

## Fifteen Post Footballers Given Letters

WHITTIER, Dec. 10.—Fifteen football men received their letters last night at the annual football banquet at Whittier College. Of this number there were but three who received their fourth letter for four years' service to the college. They were Waldo Woodward and William Kramer, guards, and Clarence Rayburn, tackle. Until this season Rayburn had played for three years.

Edward Thompson, star halfback, was chosen captain of the 1926 team, the choice having been made by the fifteen letter men by vote, at a meeting preceding the banquet.

To win a letter the men had to play in seven quarters of the conference games. The men and the number of letters earned, including those of the season just closed, follow: John Compton, 3; Joe Buckmaster (captain), 3; Ralph Hampton, 1; Frank Shafter, 1.

### MEET ON MARCH 3

(EXCLUSIVE DISPATCH) NEW YORK, Dec. 10.—The One Hundred and Second Regiment of Engineers Army, New York City, will be the scene of the annual intercollegiate indoor track and field meet March 3, 1926.

### OPPOSES OLYMPIAD MONOPOLY

(BY CABLE AND ASSOCIATED PRESS.) LAUSANNE, Dec. 10.—Baron Pierre de Coubertin, founder of the Olympic games, and president of the international Olympic committee which has its headquarters at Lausanne, on the occasion of a reception given in honor of the delegates to the Near East peace conference, made an important statement with reference to the future of Olympic games in the United States and the co-operation of Germany in the games. The reception was attended by members of all the delegations to the peace conference. Baron de Coubertin, as president of the international Olympic committee, said he did not believe Europe had the right any longer to monopolize the Olympic games. "There is something astounding in the way we on this side constantly ask the Americans to come to us, without facing the possibility of ever going to them," he declared. "It will be the international Olympic committee's duty to make the olympics henceforth a much more American affair than ever before. Then, we must think of our numerous friends and followers in Far Eastern lands. South American and African interests have to be taken into consideration. Such a movement cannot be governed on a single-centered plan."

## HOW TO REDUCE IS EXPLAINED

Obesity Discussed by Noted Health Culturist

Exercise Necessary to Pull Down Weight Told

Simple Stretching Stunt at Home Easy Remedy

### ARTICLE X

BY BARCLAY L. SEVERNS

The excess accumulation of fat must be considered as a symptom rather than as a disease. It is due to overnutrition, to underoxidation, or to a combination of both acting together. When overindulgence in food is practiced, the surplus is stored up as fat in the tissues least disturbed by muscular action. Local deposits are made in the region of the abdomen and hips or in a general layer through the subcutaneous tissues of the entire body.

The normal oxidation of the ingested food may be hindered by a sedentary life involving little tissue waste from muscular exercise.

### To Reduce

An exercise to aid in overcoming obesity is illustrated by Barclay L. Severns, health expert. Mr. Severns explains fully in the accompanying article its manner, purpose and result.

### The desire for exercise diminishes as the amount of fat increases, and the capacity for activity is lessened because of the speedy exhaustion that follows any unusual muscular work.

Obesity is most frequently found about the waist line, the deposits occurring in the abdominal walls. Fat, like many other things, follows the lines of least resistance, and little or no attention is paid to proper and regular exercise of the abdominal section by people as a general rule who are overweight. But if they do, it is to the extreme in most cases, and very strenuous exercise is taken up with a grim determination to reduce the fat in a few days. Some take a Turkish bath every few days, go on a very light diet, stop smoking, and use for long, which is a good thing.

Exercise is one of the necessary things to do for reducing weight, but should be taken properly in a very mild form at the start, and one should know what exercises to take, and should know the condition he or she is in before starting. Many a person has been ruined by exercise and diet from lack of knowledge as to what they were doing.

As a general rule, it takes several years to accomplish the great feat of putting fifty to seventy-five pounds of surplus fat, yet most people seem to think it is a joke, and can be taken off in most any way, so they get it off the quicker the better. If they see an exercise that looks good to them, some magazine they go to it, hammer and tongs, morning, noon and night, go to the gym and try everything they can find and muse because they have nothing more strenuous to work at. At that time they often put on more weight and wonder what has happened.

But allow me to tell you that fat is no joke. If it were, the insurance companies would not turn you down flat. They refuse to take the risk. You know that they have told you, and yet you go on and laugh at it.

The diet should be regulated so as to give the proper amount of nourishing food, yet omit the starchy foods in most cases. Walk as much as you can (but do not depend on walking alone), exercise regularly, but take it in a mild form at first and increase as the muscles grow stronger. Exercise more vigorously as you advance. Be patient; the organs of the body were while you were having the fun of putting it there. Pay a great deal of attention to your breathing.

The intake of liquids should be limited. The weight of an obese subject is rapidly reduced by restricting the liquids to a minimum. The loss of weight is apparent in short time, being due to a direct loss of water from the tissues by the air passages, skin and kidneys, and to the fact that one is inclined to eat less when not drinking freely at meal times.

As I have stated above, this should be taken slowly, when excessive it is most exhausting; to the system and is apt to be dangerous.

The exercise above is what is known as a stretching exercise for the abdominal muscles, and should be taken with moderation on the starts follow:

FIRST POSITION—Stand erect, arms at side.

FIRST MOVEMENT—Raise arms in front of body to level of shoulders, turn slowly to left about eighteen inches, return to first position; repeat, turning half way around, return; repeat, going farther each time until facing rear, return to first position.

SECOND MOVEMENT—Repeat, turning to right.

Breathe naturally while executing this exercise.

## NATIONAL LEAGUE PITCHING AVERAGES

RECORD OF NATIONAL LEAGUE PITCHERS WHO THREW AT LEAST ONE COMPLETE GAME IN 1925

# Film Star to Address Women on the Indian

Monte Blue, star from Warner Brothers' Hollywood studio, is to address the Woman's City Club members when they meet in Walker Auditorium this afternoon at the request of Mrs. William P. Cunningham, president.

He will make a short talk on the ambitions and political desires of the American Indian, which the club members are endeavoring to enfranchise by petition to Congress.

Mr. Blue, Mrs. Raymond Hatton and Mrs. Rupert Hughes, were named to represent the motion-picture industry in the signature drive. Blue's real name is Blue Mountain, and he comes of a Cherokee tribe. He won fame as Danton last year in Griffith's "Opheans of the Storm." He has sent copies of the petition to all the local studios and also to those in New York, and hopes to receive a return of at least 5000 signatures.

### WELDER RIDGE IS BUSY

Men Begin Operations in Field Where Standard Struck Good Production

(EXCLUSIVE DISPATCH)

WELDER RIDGE, Dec. 10.—The first company to start activities in the Welder ridge following the news that the Standard Oil Co. had struck a well of gas in the Welder ridge in that territory of Welder ridge, headed by E. J. Allen, E. B. Hougham and J. H. Hougham, has secured forty acres near the Welder ridge and struck a well of gas which plans to spend the next thirty days.

Activities are general throughout the field, and whose judgment all men have come to bank upon. The new well is to be known as the No. 2-G, and is located on section 18, 11-32.

The Pacific Oil Company has been particularly active during the past week, having started three new wells in the Midway field, tested another for water shut-off and started deepening process in three others. The new wells are located on three different sections, No. 21 on section 15, 11-32; No. 22 on section 16, 11-32; and No. 23 on section 17, 11-32. The well on section 15, 11-32, is being drilled to a depth of 4,000 feet, and the well on section 16, 11-32, is being drilled to a depth of 3,500 feet. The well on section 17, 11-32, is being drilled to a depth of 3,000 feet.

The Balboa Oil Company, which has been meeting with great success in the Midway field, has started two more wells in this field on section 34, 11-32, and section 35, 11-32. The well on section 34, 11-32, is being drilled to a depth of 4,000 feet, and the well on section 35, 11-32, is being drilled to a depth of 3,500 feet.

### LONG BEACH IS REAL OIL FIELD

Gets Two 4000-Barrel Wells Within a Week

Cooling-Mohawk Controls Springs Syndicate

Bellflower Coming to Fore in Production

BY ELLWOOD J. MUNGER

Four thousand-barrel wells are getting to be a common occurrence at Long Beach. Two wells, one doing nearer 4000 than 4000, and another making close to 4000, were brought in last week. The Marine Oil Corporation sprang a tremendous surprise by bringing in a well on the Thacker property known as No. 1 with a flow estimated all the way from 3000 to 4000 barrels. The big producer on being tested was found to be making an average production of 4100 barrels a day. This is the second largest well in the Long Beach field, and is being drilled to a depth of 3750 feet.

The eight one-quarter water string wells are in the big oil field, and are being drilled to a depth of 3750 feet. The well on section 11, 11-32, is being drilled to a depth of 3750 feet, and the well on section 12, 11-32, is being drilled to a depth of 3750 feet.

The Shell Company's Alamoite property, known as the discovery property of Signal Hill, is proving to be a real oil field. The well on section 11, 11-32, is being drilled to a depth of 3750 feet, and the well on section 12, 11-32, is being drilled to a depth of 3750 feet.

### BOND ISSUES ON INCREASE

Offerings Nearly Double Those of Week Before

Bankers Preparing to Meet Reinvestment Demands

Government Short Terms Are Most in Favor

(BY A. P. MOORE WIRE)

NEW YORK, Dec. 10.—New bond offerings totaling \$28,000,000 were put out by local bankers last week as compared with \$15,575,000 the week before, and indications are that next week's total will exceed \$30,000,000. The sudden increase may be explained by bankers' preparations to meet the government's reinvestment demand, the better tone of prices in the high-grade issues listed on the exchange and the removal of the uncertainty concerning the government's short-term financing, which had had a restraining effect on business.

Local bankers believe that the government will have little difficulty in disposing of its \$700,000,000 short-term issues, preliminary subscriptions having come in large numbers. The government has made today of a \$15,575,000 issue of first mortgage, 7 per cent bonds of the United States Government.

LISTED BONDS REACT

Selling of speculative railroad mortgages for taxation purposes had a reactionary effect on prices of listed bonds during most of the week. The market for railroad bonds was particularly strong. The market for railroad bonds was particularly strong. The market for railroad bonds was particularly strong.

### COUNT HELD AS COUNTERFEITER

(Continued from First Page)

to protect the other, Gladanovic is a former Austrian army officer and Popovich was an officer in the Serbian army during the war and later in the U. S. Air Service. This indicates, the secret service declares, that European hates are easily shuffled in this country when there is money to be made.

When Gladanovic was arrested in San Francisco, Agent Hazen says, Popovich, who was at the railway station with him, eluded the arresting officers and made off to New York, after securing a large bundle of the asserted counterfeiters from a secret hiding-place in Gladanovic's home at Tropic. The federal officers missed him there by half an hour, but in his room they found a crumpled envelope giving his brother's address in New York and a photograph which had been taken in a bureau and so escaped destruction when Popovich cleared up his effects. The New York officers arrested him at his brother's home.

TOLD STORY REHEARSED

Simon, who was an expert photographer with a studio on North Broadway, is asserted to have made the plates and Popovich to have printed them. The plates, according to Agent Hazen, were found in a room adjoining Simon's home, to which Simon had the key.

Gladanovic told his story a little at a time and it was not until Friday, when he was shot to death before the Grand Jury, Agent Hazen says, that he brought Count Orloff's name into the plot. He said that Count Orloff, a Russian nobleman, lived on Vermont avenue. When Agent Hazen and Deputy U. S. Marshal Charles Shortridge went there, he found that the Count had given up his rooms at the landlady's request and moved elsewhere.

The federal officers then made the rounds of the studios and at last got word that the Count was on location at San Diego with one of the Leaky companies. But the company had been before the officers reached San Diego.

FIND NEW HOME

Saturday afternoon the officers found Count Orloff's new home on North Kingsley Drive. The Count, however, was not there, but Olga Ragawaka, who said she was his sister, was there. She was an interior decorator.

"We have a star part in 'The Count of Monte Cristo' for him," said Mr. Ragawaka, who represented the Count as coming from the studio. "Ah, but that has been filmed. He had a part in it," objected Miss Ragawaka.

"It is to be a new and more elaborate version," the agent insisted. "It will mean steady work for him for at least two years."

The agent referred that this last part was probably true enough. With this admission, however, that the Count must be on the loose, the agents went about half a block away, where they parked until 11 p.m. Saturday waiting for the Count to return. They paid another visit to his rooms and found that he had been there, but that he had moved to the Count in bed.

"He is a wretch!" the Count exclaimed, according to the officers, when he was told of the real situation. He readily admitted his acquaintance with Gladanovic, Popovich and Simon, according to Mr. Hazen, but denied any wrongdoing on his own part.

The Bank of England, according to Mr. Hazen, relies on a peculiar kind of paper and a peculiar watermark to protect its currency. The counterfeiters, he declares, are so good, he declares, that they would deceive anyone not accustomed to handling Bank of England paper in considerable quantities.

Gladanovic had worked in the foreign department of the Bank of England for many years. He was formerly manager of the foreign department of the Bank of England for many years. He was formerly manager of the foreign department of the Bank of England for many years.

### HARRY NEW, JR., SEEKS PAROLE

(Continued from First Page)

when New brought her body to the central police station and said that he had killed her. He did not testify at the trial and in her affidavit, which was made on March 20, 1920, shortly after New was taken to prison, Miss Clancy says that not only had he begun to serve his sentence did New go into details and tell the incidents of the fatal ride. His explanation of his silence was, Miss Clancy states in her affidavit, that he confessed shooting Miss Lesser in order to shield her good name.

SAYS GIRL SHOT

In the story told to Miss Clancy at the prison, as set forth in the affidavit, New said that when Freda Lesser, whom New intended to marry, told him during the drive that she had been receiving attentions from other men, and New had replied that he was going to take her home, tell her mother, and then have nothing more to do with her, Freda reached into the side pocket of the automobile, drew forth a revolver, there and shot herself. This happened, New said, on the road between Venice and Los Angeles. After he heard the shot, New said he stopped the car and discovered that she was dead. New said he sat in the car for several hours wondering what to do, and finally decided to drive to the police station and say he had killed the girl.

Following the surrender of New at the police station, he was tried before the Superior Court Judge Craig, where New was defended by Le Compté Davis, Jud R. Rusk and John L. Richmond. The case was personally prosecuted by District Attorney Woolwine and Dep. Dist. Attorney Keyes.

Alameda for the defense testified that New was a "thoron" or one having the mentality of a child.

SERVED AS SOLDIER

The jury found New guilty of second-degree murder, and he was sent to prison for a term not less than ten years and for as much as life imprisonment, according to the later rulings of the prison authorities, the Governor, and the State parole board. The application filed yesterday asks for a commutation of the sentence to a minimum of five years.

New, who has always asserted that he was the son of U. S. Senator Harry S. New of Indiana, was born in Indianapolis, Ind., and was a member of the Indiana National Guard. He was a member of the Indiana National Guard. He was a member of the Indiana National Guard.

### RELATIVES OF DEAD MAN SOUGHT HERE

GEORGE W. BROWN'S BODY IS FOUND IN ROOM AT TACOMA

A telegram was received yesterday from Tacoma, Wash., by Chief of Police Oake, requesting information concerning relatives of George W. Brown, aged 50 years, who is reported to have a sister and two children living here.

The request was made by the undertaking firm of F. Oscar Storey in Tacoma, which took charge of Brown's body after he was found dead in his office, there at Fifty-fourth street and Union avenue. Brown is said to have lived in Tacoma about three years. His friends here in Los Angeles are being sought.

### CINEMA STARS RETURN HOME

(Continued from First Page)

In "The Law" in which Miss Leahy is to play second lead to Norma.

FROM SHOP COUNTER

From a London shop girl to the front rank of the films is quite a jump, but that is the career of Miss Leahy as outlined by Constable and Norma Talmadge. At the age of 14, seven years ago, Miss Leahy began work, and at 17 she was the manager and buyer for an exclusive store in a London suburb. Her hours were anything but short for she worked from 9:30 a.m. to 9:30 p.m. with time to herself after 11 p.m. Saturday nights.

Such was her life when the London Daily Sketch started a beauty contest, which she won from an entry list of 30,000 entries. Miss Leahy was proclaimed "the prettiest girl in the British Isles."

Norma and Constance Talmadge saw her first at the Victory Ball in London. In a beauty contest, Miss Leahy was again voted the prettiest girl in the world. The additional title of "the girl with the perfect film face." Beautiful blue eyes look out at you from a pair of naturally pink cheeks. Just a touch of golden hair protruding from the edge of her hat as she stood before the camera. Miss Leahy has had her expenses paid to America and will receive a salary while working her way to a personage in filmdom under the guidance of Norma and Constance Talmadge.

### BOYS BELIEVED IT IS BLESSED TO GIVE

By a "Times" Staff Correspondent

SANTA MONICA, Dec. 10.—The holiday spirit is said to have infected Henry Long and Wayne Garcia, each aged 14 years of Ocean Park, to various acts of generosity. They had taken to use as Christmas presents.

### STANDARD COMPLETES

The Standard Oil Company's Santa Fe Springs completion for the week was Hepler No. 2, a 500-barrel well, at 2905 feet. The Brownrigg Keller No. 2 set a string of eight in one-fourth at 4190 feet, and is ready to go on into the deep sand found in No. 1 at 4700 feet.

The Union Oil Company's Flood well, the output well of the north-west side, has reached a depth of 5100 feet. The outlook can be said to be a little more encouraging with the change of formation from gray shale to sand and oil.

Petroleum Center No. 1, the well scheduled to open up the south extension of the Santa Fe Springs field, has succeeded in getting out an overshot that has blocked drilling for a month. With only six joints of drill pipe and a pumpjack got out of the hole, the Petroleum Center will be making hole again in a few days.

Huntington Beach the Amalgamated and the Holly Oil Company took the week's production with 1500 and 1550-barrel wells, respectively. The Amalgamated's completion was made on Miller-Kee No. 4 at a depth of 4485 feet. Miller-Kee No. 13 has passed the 4900-foot mark drilling and if it comes into production it will be a new deep record for production will be set. On the Pearce property the Amalgamated has a large well, No. 1 and No. 2, which will be a new deep record for production will be set. On the Pearce property the Amalgamated has a large well, No. 1 and No. 2, which will be a new deep record for production will be set.

### WILL GO DEEPER

Ed Herwick's famous No. 7, on production, but is not coming up to expectations. This well, which is located at 4525 and is making between 350 and 400 barrels. Herwick's No. 7 was drilled to a depth of 4525 and is making between 350 and 400 barrels. Herwick's No. 7 was drilled to a depth of 4525 and is making between 350 and 400 barrels.

## The Business Man's Department Store

### What Shall We Give the Boss?

#### A Gift From One Business Man to Another

No gift shows better your understanding of a business associate's problems than a fine desk.

#### A Gift from a Business Man to His Son

Start the boy off right. A Remington Portable Typewriter (\$60) or a good desk and office chair will foster business interest and start him on the way to success.

7 Floors of Office Equipment

The Business Man's Department Store

Give him something that will make every day more pleasurable. Select it where HE would select it, at "The Business Man's Department Store."

A beautiful period office desk, and if you choose an entire office set to match. Chairs of many descriptions.

**CUT GLASS INK SETS**  
Always thoughtful gifts. Prices start at \$9.50.

**DESK PADS**  
Simple or elaborate as you choose. Priced from \$1.50.

**HAND-PAINTED DESK LAMPS**  
Genuine "Handel" hand-painted desk lamps for roll top or flat desks. Priced at \$18.00. Other lamps from \$5 up.

**TELEPHONE STANDS**  
Acceptable gifts for any business man, \$12 or more.

**KLEARFLAX RUGS** will brighten up the office, prevent noises—and wear like iron. A surprise gift. Prices start at \$23.

Cupboards, portable typewriters, safes and many other practical gifts may be selected at this store.

**Los Angeles Desk Co.**  
848-50 S2 HILL ST

## TRADE VOYAGE PLANS RELATED

Los Angeles Tourists Will Visit South America

Departure is Scheduled for January 24

Inaugurates New Service to the East Coast

Final arrangements for Chamber of Commerce members planning to tour the east coast of South America upon the inauguration of the new steamship service of the U.S. Shipping Board under Swayne & Hoyt are announced by the foreign trade department of the Chamber of Commerce.

With the first sailing of the S.S. President Hayes it is anticipated that a representative delegation of Los Angeles business men will leave the city on January 24, returning after a thorough inspection of the South American trade field in the Argentine Republic, Porto Rico, Uruguay and Brazil, where the party will witness the annual days inspiring the exhibits of the Brazilian Centennial Exposition.

### NINETY-DAY TRIP

Ninety days will allow manufacturers and traders to make connections with South American enterprises and absorb the atmosphere of the southern republics, with whom Los Angeles will in the future do a large business, according to prognostications of financial and shipping experts.

Fare for the entire trip, including meals on board, will amount to \$225 or \$212.50, according to accommodations reserved. This will approximate a cost of \$7 per day.

For two days the party will remain in Buenos Aires, allowing time for a side trip by rail to Santos via Sao Paulo and on to Rio de Janeiro.

The voyage will carry visitors 12,238 miles from Los Angeles to the southernmost point of Buenos Aires, the South American capital, and return to Los Angeles, with stops at Ponce and San Juan, Porto Rico, the Canal Zone and Montevideo and Santos as well as Rio de Janeiro, headquarters of the Exposition, and in the Panama Zone.

For the purpose of encouraging trade relations it is said that the Shipping Board has offered to make rates for those desiring to make business trips to South America, and the assistance of the Foreign Trade Department of the chamber has been enlisted to interest agents and manufacturers in the South American territory.

### Peking Triumphant

Peking is really three cities in one. There is an inner or Manchurian city, an outer or Chinese city. The inner comprises the imperial city, which, in turn, contains the "Forbidden City," or the purple forbidden city, inside the walls of which again is the imperial palace. Peking itself is one of the oldest cities in the world, being known to exist in the twelfth century before Christ, but although it is of immense size, being twenty-five miles in circumference, much of the space within the walls is unoccupied.

## INSULIN IS OBJECT OF RESEARCH

Means Sought to Obtain Cheaply New Substance Used in Diabetes

The California Institute of Technology announced yesterday that a fund had been made available through Dr. Bernard Smith of Los Angeles, for the pursuit of biochemical researches in the chemical laboratory, on the production of insulin. This is a substance extracted from the pancreas of animals which has recently been found to be extraordinarily effective in the treatment of diabetes.

This substance, which is formed in the pancreas of healthy men and animals, has the important function of causing the sugar derived from the food to be oxidized to carbon dioxide and water, thus generating throughout the body the heat and muscular energy needed for the maintenance of life. In diabetes the pancreas becomes diseased, the sugar remaining unoxidized accumulates in the blood, with the result that the patient slowly starves from lack of nourishment and suffers from attendant complications. It has been found, however, that injection of insulin prepared from the pancreas of cattle almost immediately relieves these conditions. Whether it will effect a permanent cure by enabling the human pancreas gradually to recover its normal function is as yet undetermined.

The preparation and medical use of this extract has been developed only within the past year, mainly through researches carried out at the medical school of the University of Toronto. Unfortunately, the present method of preparation of the substance is so elaborate and costly that the supply thus far has been utterly inadequate for medical purposes, and the product obtained is so variable in potency that what is available can be used only by physicians who, by experience, have become thoroughly familiar with the proper conditions for its use.

The researches to be carried out by the California Institute of Technology are purely chemical in their nature, being only an extension of its work in organic chemistry in a new direction. The purpose of the research will be to improve the method of extraction of insulin, with a view to developing a much less expensive process and one which will result in an extract of uniform, dependable quality.

The institute will not prepare insulin for medical use nor study its application in the treatment of the disease. Investigations in this latter direction will be carried out by Dr. Smith, who, with his associate, Dr. Harold P. West, will also co-operate in the researches at the institute, especially by affording the necessary co-ordination between the chemical and clinical sides of the problem. The results of the work will be published promptly, so that the benefit of the researches may be made generally available as quickly as possible; for the undertaking has in view no commercial object.

These biochemical researches will be under the general direction of Prof. A. A. Noyes, director of the Gates Chemical Laboratory, with the co-operation of H. J. Lucas, professor of organic chemistry, and Dr. W. N. Lacey, professor of chemical engineering. Gordon A. Alles will be in immediate charge of the experimental investigations, in which A. L. Raymond and H. M. Winegardner will co-operate.

## LAST DIME SPENT FOR BABY MILK

Pitiful Case Brought to Shriners' Attention and Relief Supplied

Down to their last 10 cents, and this spent to buy milk for the baby and 5-year-old son.

Of the many pitiful calls for aid made at the Shriners' relief headquarters, 1040 South Broadway, this case presented the most urgent need, and the Shriners' Santa Claus rendered emergency aid to tide the little family over until the Yuletide season.

"All we had was a bottle of milk, and we've been walking ever since," lapped the little fellow in tragic echo of his mother's plea for help.

Mother, father and two little ones are strangers in Los Angeles, and the father has been unable to secure work. One bed in a cheap Japanese rooming-house has served the little family during the last week or so.

The man, hungry and weakened from many days of short rations, started out on another weary round for work. The young mother, her baby in her arms, and the little son clinging to her hand, walked to the Shriners' relief headquarters to ask for temporary aid.

And meanwhile hundreds of letters are piling up in the relief headquarters, each brimming in some story of need, suffering, hunger and destitution; which might be lightened by such simple things as warm clothing, underclothing, a coat or shoes.

The Shriners' truck will call for donations that should be brought to their headquarters in person. Their telephone number is 220115.

## Sailor May Die as Result of Auto Smash-up

H. F. Flager was injured fatally, it is believed, and Arthur Major was badly cut and bruised in an automobile accident near Nigger Slough yesterday morning, when the car in which they were riding was struck by a speeding truck, the driver of which escaped.

The accident occurred on Harbor Boulevard at about 1 a.m., when Flager, chief boatwain's mate on the U.S.S. Tern, and Major, a co-

## Prominent "Y" Secretary and Mason Is Dead

William Thomas Perkins, aged 64 years, New York State secretary of the Y.M.C.A. building and financing committee, and a prominent thirty-second degree Mason, died at the Chase Sanatorium yesterday morning, following an illness of several months.

Funeral arrangements have not been completed but probably will be conducted Thursday afternoon at Pierce Brothers funeral chapel. Burial will take place in a local cemetery.

Mr. Perkins, who, with Mrs. Perkins, lived at 118 South Union street, came to Los Angeles for his health about a year ago, having been granted an extended leave of absence by the association committee which he served. He had been in Y.M.C.A. work all his life, had traveled thousands of miles in the interest of the association and, according to Mrs. Perkins, his illness and death were largely due to overwork in the cause he loved.

## Self-Inflicted Wounds Fatal to Young Divorcee

Mrs. Ruth Haner, young divorcee of Spokane, who attempted suicide Saturday night by shooting herself in the head at the Monroe Apartments, 1228 West Sixth street, died yesterday at the Receiving Hospital.

Dependancy was given by Detective Sergeant Cline as the probable motive for her act. Mrs. W. D. Connell of 6145 Prospect avenue, Maywood, a sister, told the detective that Mrs. Haner was

swain on the same ship, were returning to the harbor after a leave of absence in Los Angeles.

According to Major, who, with his companion, was taken to the Submarine Base Hospital, there were no lights on the truck and, immediately following the smash, the driver sped on without stopping to ascertain what injury had been done. The police at the harbor are investigating the case.

Flager suffered a fractured skull and internal injuries, and surgeons think he will die. Major will recover, it is believed.

## Hamburger's STORE FOR MEN

## Value --- Variety

—features Hamburger's great Christmas stocks of men's fine robes and smoking jackets—"comebacks" (those who look around before they buy) tell us our values cannot be beaten

## Smoking Jackets 7.50 to 35.00

They just look "comfort"—and smartness, too! And there is a style, a color and a price to meet every man's desires. They have many smart, distinctive features—cord fastenings, braid edgings, plaid backed—sizes for all builds of men, including stouts and longs.

## Bath Robes 5.00 to 18.00

One hundred different styles! Can you imagine such a variety that does not contain the style YOU are in quest of? A big enough assortment of color effects to please every individual taste.

## Lounging Gowns 15.00 to 65.00

Silk or wool. The wool in plain colors, neat checks and over plaids at 15.00 to 30.00. And beautiful silk ones, double-breasted kimono and three-quarter styles—some with silk sashes to match—18.50 to 65.00.

## TAX DUE FRIDAY

Last Installment of Income Payments Notice Issued

Thirty-five thousand taxpayers in Southern California have been notified by Collector of Internal Revenue Goodell that the fourth and final payment on their income tax will be due Friday.

Taxpayers who fail to meet this final installment will be classed as "delinquents" and the unpaid balance will be subject to immediate demand, upon which penalties and interest will apply.

Remittances should be made by check or money order and payable to the Collector of Internal Revenue. If cash is sent the letter should be registered.

## WRIT IS REFUSED

Habeas Corpus Denied Man Harboring Herb Wilson in Jailbreak

The application for a writ of habeas corpus made by Attorney Joe Forbes on behalf of Tom Garwood, charged with harboring and aiding criminals in connection with the escape of Herb Wilson and two of his pals from the County Jail was denied Saturday by Judge Reeve.

The court also refused to reduce the suspect's bail from \$10,000 to \$2,500, as requested by the attorney.

## STEAMER HITS FISH ROCKS DURING GALE

ESSEL HITS FISH ROCKS DURING GALE

BY A. P. NIGHT WIRE.

SAVANNAH, Dec. 11.—The steamer Otteric is ashore off Fish Rock, Cal., according to an R. O. S. message picked up here shortly after 10 p.m. by the Radio Corporation of America's marine station.

The Otteric's message said: "The Otteric is ashore off Fish Rock 10 p.m. today badly."

Messages picked up here indicated the steamer Otteric was proceeding to the assistance of Otteric.

Messages picked up by Federal Dispatch Company said water was into the number one and two holds of the Otteric.

The steamer Otteric is a vessel built by Donaldson & Sons at Sunderland in England. She is owned by the Bank Ltd. of Glasgow. She is un-

dered by the British registry and is 413 feet long and has a beam of fifty-five feet. She is of steel construction.

El Segundo is a steel screw steamer owned by the Standard Oil company. She is rated at 3444 and her home port is San Francisco.

Otteric left San Francisco at 1 p.m. for Eureka, where she was to load lumber, prepared for the Otteric's rescue. It was said at the office of the marine department of the Federal Dispatch Company, in connection with the Otteric and El Segundo are in connection with each other, expecting a rescue party to arrive about 3 o'clock.

Further messages from the Otteric said she was in the water but it is not believed any immediate danger was said in the radio message regarding the weather, with exception that there was a fog but no fog.

At 10:40 this message from the Otteric was picked up here: "The Otteric is on the beach now."

Further messages had been heard from the Otteric half an hour later.

The Red Stack Towboat Company was getting a tug ready to take a rescue crew to the Otteric. It was not believed any rescue party would arrive at the Otteric's position.

Commander G. C. Carver of the United States coast guard cutter Shawnee would be in Fish Rock at dawn to be in the water to assist the Otteric or the rescue crew to the Otteric.

At 11:40 this message from the Otteric was picked up here: "The Otteric is on the beach now."

Further messages had been heard from the Otteric half an hour later.
